The Learning Organization Paperback:

The Oxford Handbook of the Learning Organization Anders Örtengren, 2019-12-12 The concept of the learning organization is one of the most popular management ideas of the last few decades Since it was conceived as an idea in its own right it has been given various definitions and meanings such that we are still faced with the question as to whether any unified understanding of what the learning organization really is can be established This Handbook offers extensive reviews of both new and traditional perspectives on the concept and provides suggestions for how the learning organization can best be defined practiced studied and developed in future research With contributions from long standing scholars in the field as well as those new to the area this book aims to bridge the gap between traditional and more critical perspectives and in doing so find alternative features and angles to take the idea forward In addition to elaborating on and developing older definitions of the learning organization and suggesting updated and even new definitions the chapters also provide focused explorations on pertinent aspects of the learning organization such as ambidexterity gender inclusivity and systems thinking They also survey organizations that have made efforts towards becoming learning organizations how the learning organization can best be measured and studied and the universality of the idea itself Some of the questions raised in this book are answered or at least given tentative answers while other questions are left open In this way the book has the ambition to take the learning organization an important step further whilst having no intentions to take any final step instead the intention is that others will endeavour to continue where this book stops

Learning in Action David A. Garvin, 2003-03-25 Most managers today understand the value of building a learning organization Their goal is to leverage knowledge and make it a key corporate asset yet they remain uncertain about

how best to get started What they lack are guidelines and tools that transform abstract theory the learning organization as an ideal into hands on implementation For the first time in *Learning in Action* David Garvin helps managers make the leap from theory to proven practice Garvin argues that at the heart of organizational learning lies a set of processes that can be designed deployed and led He starts by describing the basic steps in every learning process acquiring interpreting and applying knowledge then examines the critical challenges facing managers at each of these stages and the various ways the challenges can be met Drawing on decades of scholarship and a wealth of examples from a wide range of fields Garvin next introduces three modes of learning intelligence gathering experience and experimentation and shows how each mode is most effectively deployed These approaches are brought to life in complete richly detailed case studies of learning in action at organizations such as Xerox L L Bean the U S Army and GE The book concludes with a discussion of the leadership role that senior executives must play to make learning a day to day reality in their organizations *Creating the Learning*
