The Geek Dad Book for Aspiring Mad Scientists Ken Denmead, 2011-11-01 Fans of the New York Times bestselling *Geek Dad* and *The Geek Dad's Guide to Weekend Fun* will flock to the 3.0 version *The Geek Dad Book for Aspiring Mad Scientists*. As Ken Denmead explains, most kids lack an understanding of science and an awareness of how it influences our everyday lives. What kids today need is a fun way to learn scientific concepts. This book will help scientists in the making discover how our world works with creative project ideas including how to grow crystals to power your Stargate and set your room aglow. Extract your own DNA and decode your genes. Build a MacGyver radio from nothing but cast off electrical and office supplies. Chock full of instructional illustrations throughout *The Geek Dad Book for Aspiring Mad Scientists* puts the fun back in science.

The Mad Science Book Reto U. Schneider, 2008 You don't have to be an eccentric obsessive to be a scientist but it helps. In *The Mad Science Book* Reto Schneider tells the extraordinary tales of 100 of the more unusual experiments conducted across seven centuries of science. From the attempts of the 14th century Dominican monk Theodoric von Freiberg to discover the cause of the rainbow to the efforts of the 20th century psychologist Harry Harlow to be the perfect mother to a family of reluctant rhesus monkeys these are stories that are often bizarre sometimes mind boggling occasionally stomach churning but always diverting informative and enlightening. Among the myriad delights on display in this cabinet of scientific curiosities are the renowned doctor from Padua who sat in a pair of scales for 30 years recording the minutest changes in his weight the sheep the duck and the rooster who became the world's first air passengers the disgusting Dr Stubbins Ffirth who swallowed other people's vomit in an attempt to prove that yellow fever cannot be transmitted from one person to another the hapless soldier Alexis St Martin left with a hole in his stomach after an accident with a musket and the ever optimistic Charles douard Brown S quard who injected himself with essence of guinea pigs testicles as an anti ageing remedy. There is trivia here in abundance but also quirky but genuinely influential science notably Merrill Flood's and Melvin Dresher's experiments with choices of outcomes which have been widely influential as game theory. A fizzing cocktail of fascinating
