**Making Mind** Gregory F. Tague, 2014-01-01 *Making Mind Moral Sense and Consciousness in Philosophy Science and Literature* posits the genesis of narrative as an adaptive function stemming from consciousness and moral sense The book is unique with its idea of the individual character evolving narrative in relation to the group Central to the argument is the claim that prehistorically consciousness and moral sense intersected to form narrative More than addressing the origin of story the book examines and explains the evolution of narrative The book is an interesting study of how our species inherited moral sense can differ dramatically from one individual to another While mores pertain to a group narrative comes from and is processed by the individual and reaches its high point in the novel We see how the moral sense works in characters as a monitor and we feel it operating in us as readers in terms of approval or not

**The Concept of Mind** Gilbert Ryle, 1984 This now classic work challenges what Ryle calls philosophy's official theory the Cartesian myth of the separation of mind and matter Ryle's linguistic analysis remaps the conceptual geography of mind not so much solving traditional philosophical problems as dissolving them into the mere consequences of misguided language His plain language and essentially simple purpose put him in the tradition of Locke Berkeley Mill and Russell philosophers whose best work like Ryle's has become a part of our general literature

**Constantine and the Divine Mind** Kegan A. Chandler, 2019-12-18 Constantine's conversion to Christianity marks one of the most significant turning points in the epic of Western civilization It is also one of history's most controversial and hotly debated episodes Why did Constantine join a persecuted sect When did he convert And what kind of Christian did he ultimately become Such questions have perennially challenged historians but modern scholarship has opened a new door towards understanding the fourth century's most famous and mysterious convert In *Constantine and the Divine Mind* Chandler offers a new portrait of Constantine as a deeply religious man on a quest to restore what he believed was once the original religion of mankind monotheism By tracing this theological quest and important historical trends in Roman paganism Chandler illuminates the process by which Constantine embraced Christianity and how the reasons for that embrace continued to manifest in his religious policies In this we discover not only Constantine's personal religious journey but the reason why Christianity was first developed into a world power
