Slow Death And Other Oklahoma Murders:

Slow Death. . . and Other Oklahoma Murders Mary Ellen Cooper, 2003-06 Carol Ann Heller thought she'd found the man of her dreams when she'd married Dennis Heller but less than a year later her health was shattered and she lay dying of a mysterious illness Only a sharp ER doctor suspected the truth too late to save her Then two tenacious investigators pursued the killer who condemned her to a SLOW DEATH And other stories of Oklahoma murders **The Slow Death of the Death Penalty** Todd C. Peppers, Jamie Almallen, Mary Welek Atwell, 2025-07-01 Why the death penalty is in decline across the United States Across the country the death penalty is dying Twenty two states have abandoned state sanctioned executions including nine in the last fifteen years Of the twenty eight states that still have the death penalty eight have not had an execution in over a decade And public support for the death penalty has declined from 80% of the surveyed population in the early 1990s to approximately 50% today As the death penalty slowly withers away Todd C Peppers Jamie Almallen and Mary Welek Atwell bring together a number of distinguished death penalty scholars activists and attorneys to take an accounting of the damage inflicted by the machinery of death Contributors to the book point to a range of different pathologies which have caused politicians and voters to turn against capital punishment from unacceptable rates of false convictions and racially motivated prosecutions to a clemency process poisoned by political factors Essay topics include various dimensions of the death penalty including racial and gender bias economic costs the conviction of juveniles the mentally ill and the factually innocent Supreme Court decisions and the failure of the death penalty to serve as a deterrent against crime This important volume is an up to date accounting of the current state and as the contributors argue the future demise of the death penalty

Killing Times David Wills, 2019-03-05 Killing Times begins with the deceptively simple observation made by Jacques Derrida in his seminars on the topic that the death penalty mechanically interrupts mortal time by preempting the typical mortal experience of not knowing at what precise moment we will die Through a broader examination of what constitutes mortal temporality David Wills proposes that the so called machinery of death summoned by the death penalty works by exploiting or perverting the machinery of time that is already attached to human existence Time Wills argues functions for us in general as a prosthetic technology but the application of the death penalty represents a new level of prosthetic intervention into what constitutes the human Killing Times traces the logic of the death penalty across a range of sites Starting with the legal cases whereby American courts have struggled to articulate what methods of execution constitute cruel and unusual punishment Wills goes on to show the ways that technologies of death have themselves evolved in conjunction with ideas of cruelty and instantaneity from the development of the guillotine and the trap door for hanging through the firing squad and the electric chair through today's controversies surrounding lethal injection Responding to the legal system's repeated recourse to storytelling prosecutors and politicians endless recounting of the horrors of crimes Wills gives a careful eye to the narrative even fictive spaces that surround crime and punishment Many of the controversies

surrounding capital punishment Wills argues revolve around the complex temporality of the death penalty how its instant works in conjunction with forms of suspension or extension of time how its seeming correlation between egregious crime and painless execution is complicated by a number of different discourses By pinpointing the temporal technology that marks the death penalty Wills is able to show capital punishment s expansive reach tracing the ways it has come to govern not only executions within the judicial system but also the opposed but linked categories of the suicide bombing and drone warfare In discussing the temporal technology of death Wills elaborates the workings both of the terrorist who produces a simultaneity of crime and punishment that bypasses judicial process and of the security state in whose remote control killings the time space coordinates of justice are compressed and at the same time disappear into the black hole of secrecy Grounded in a deep ethical and political commitment to death penalty abolition Wills s engaging and powerfully argued book pushes the question of capital punishment beyond the confines of legal argument to show how the technology of capital punishment defines and appropriates the instant of death and reconfigures the whole of human mortality
