Investment Opportunities Yearbook *The Metabolism of Islands* Simron Singh, Marina Fischer-Kowalski, Marian Chertow, 2021 This book makes the case for why we should care about islands and their sustainability Islands are hotspots of biocultural diversity and home to 600 million people that depend on one sixth of the earth's total area including the surrounding oceans for their subsistence Today they are at the frontlines of climate change and face an existential crisis Islands are however potential hubs of innovation that are uniquely positioned to be leaders in sustainability and climate action This volume argues that a full fledged program on island industrial ecology is urgently needed with the aim of offering policy relevant insights and strategies to sustain small islands in an era of global environmental change The nine contributions in this volume cover a wide range of applications of socio metabolic research from flow accounts to stock analysis and their relationship to services in space and time They offer insights into how reconfiguring patterns of resource use will allow island governments to build resilience and adapt to the challenges of climate change *The Hebrides* Paul Murton, 2024-07-04 Paul Murton has spent half a lifetime exploring some of the most beautiful islands in the world the Hebrides He has travelled the length and breadth of the Scotland's rugged six thousand mile coast line and sailed to over eighty islands In this new and updated edition of his acclaimed book Paul visits each of the Hebridean islands in turn introducing their myths and legends history culture and extraordinary natural beauty In addition he also meets the people who live there and learns their story He has met crofters fishermen tweed weavers Gaelic singers clan chiefs artists postmen and bus drivers people from every walk of life who make the islands tick This blend of the contemporary and the traditional creates a vivid account of the Hebrides and serves as unique guide to the less well known aspects of life among the islands

Environmental Planning in the Caribbean Jonathan Pugh, Janet Henshall Momsen, 2006-01-01 Illustrated by case studies from both smaller nations such as Carriacou Barbados and St Lucia and larger countries including Cuba Mexico and Jamaica this volume brings together leading writers concerned with environmental planning in the Caribbean to provide an interdisciplinary contemporary critical overview They argue that context is central to the practice of environmental planning in this region Rather than focusing on a deterministic colonial geography and history this volume proposes that whilst a wide range of foreign planning influences can be felt in different contexts environmental planning emerges in specific settings through the fluid interaction between local and global relations of power Thus a number of chapters explore the effects of external discourses upon the region while others examine discourses on the US style democracy and on tourism **The**

Joseph, Maud Mthembu, Camille Huggins, 2025-04-28 This book highlights the challenges with respect to climate change in the Global South. It demonstrates what has been happening in varying countries in this geographic location and how sustainable adaptation interventions could be used to alleviate these challenges. Most countries in the Global South are extremely vulnerable and unprepared for the present and future impact of climate change. Some climate change events that are presently plaguing these locations are extreme weather events such as flooding, food insecurity, disasters, and droughts. The book provides case studies and interventions that can be a source to others who are seeking to find solutions to these adverse climate change events.

Bibliography of Natural History Travel Narratives Anne S. Troelstra, 2017-06-01 Anne Troelstra's fine bibliography is an outstanding and ground-breaking work. He has provided the academic world with a long-needed bibliographical record of human endeavour in the field of the natural sciences. The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna, flora, and fossil remains. Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment. Fragmentary though they often are, these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth, providing us with a window on an ever-changing and often vanishing natural world. Without such records of the past, we could not track, document, or understand the significance of changes that are so important for the study of zoogeography. With this book, Troelstra gives us a superb overview of natural history travel narratives. The well over four thousand detailed entries, ranging over four centuries and all major western European languages, are drawn from a wide range of sources and include both printed books and periodical contributions. While no subject bibliography by a single author can attain absolute completeness, Troelstra's work is comprehensive to a truly remarkable degree. The entries are arranged alphabetically by author and chronologically by the year of first publication under the author's name. A brief biography with the scope and range of their work is given for each author; every title is set in context; the contents, including illustrations, are described; and all known editions and translations are cited. In addition, there is a geographical index that cross-refers between authors and the regions visited, and a full list of the bibliographical and biographical sources used in compiling the bibliography.

Measuring Vulnerability to Natural Hazards Birkmann, 2007-01-01 *Measuring Vulnerability to Natural Hazards* presents a broad range of current approaches to measuring vulnerability. It provides a comprehensive overview of different concepts at the global, regional, national, and local levels and explores various schools of thought. More than 40 distinguished academics and practitioners analyse quantitative and qualitative approaches and examine their strengths and limitations. This book contains concrete experiences and examples from Africa, Asia, the Americas, and Europe to illustrate the theoretical analyses. The authors provide answers to some of the key questions on how to measure vulnerability and they draw attention to issues with insufficient coverage such as the environmental and institutional dimensions of vulnerability and methods to combine different methodologies. This book

is a unique compilation of state of the art vulnerability assessment and is essential reading for academics students policy makers practitioners and anybody else interested in understanding the fundamentals of measuring vulnerability It is a critical review that provides important conclusions which can serve as an orientation for future research towards more disaster resilient communities

Foreign Direct Investment as a Tool for Poverty Reduction in Developing Countries Ronald K.S. Wakyereza, 2019-10-15 The textbook experience of poverty can be witnessed in a number of developing countries in Sub Saharan Africa South East Asia and Latin America Accordingly Foreign Direct Investment FDI has been identified as an important tool for poverty reduction as it is noted to accelerate economic growth and employment in a nation and is currently an essential issue for countries such as Uganda This book finds that Ragnar s 1953 Vicious Circle of Poverty remains undisputed even today showing that attracting FDI is not the end but that a nation s absorption capacity is equally paramount The implications of the FDI frog leap theory for developing countries and the Community Capital Absorption Capacity Development CCACD framework provide plausible poverty reduction approaches in the 21st century Without such measures bringing an end to poverty is likely to elude governments and multinational corporations in developing countries

Farthing on International Shipping Proshanto K. Mukherjee, Mark Brownrigg, 2013-06-12 The book provides an introduction to shipping in all its aspects It is a valuable source of information for students of traditional maritime law as well as for those who seek to understand maritime and shipping services on a global scale The text includes information and analytical content on national and international practices in shipping including the age old dichotomy between freedom in international shipping and the persistent demands of states to control specific maritime areas as well as

the tension between on the one hand the desire on the part of sovereign states to regulate and protect their shipping interests and on the other the abiding concern and unquestioned right of the international community to regulate the global shipping industry effectively in order to ensure maritime safety protection of the environment and fair competition
