Small Format Television:

Television Across Asia Michael Keane, Albert Moran, 2003-10-16 This book explores the trade in television program formats which is a crucially important ingredient in the globalisation of culture in Asia It examines how much traffic there is in program formats the principal direction of flow of such traffic and the economic and cultural significance of this trade for the territories involved and for the region as a whole It shows how new technology deregulation privatisation and economic recession have greatly intensified competition between broadcasters in Asia as in other parts of the world and discusses how this in turn has multiplied the incidence of television format remakes with some countries developing dedicated format

companies and others becoming net importers and adapters of formats **Global Television Formats** Sharon Shahaf, Tasha Oren, 2013-06-17 Global Television Formats aims to revise the place of the global in television studies The essays gathered here explore the diversity of global programming and approaches and ask how to theorize contemporary global formats and thus re shape our understanding of television as at once a shared global and specific local text an economic system a socio political institution and a popular practice The contributors explore a wide array of television programming from the Middle East Western and Eastern Europe South Asia North America Latin America and Brazil and represent a br *Micro Media Industries* Lori Kido Lopez, 2021-08-13 Micro Media Industries explores the media of Hmong

Americans showing how an extremely small population can maintain a robust and thriving media ecology in spite of resource limitations and an inability to scale up It argues that micro media industries provide models of media innovation that can counter the increasing power of mainstream media Perspectives on Radio and Television F. Leslie Smith, David H. Ostroff, John W. Wright, 2023-05-31 This textbook describes the field of radio and television in the United States presents the material in a manner the reader can grasp and enjoy and makes the book useful for the classroom teacher Written for adaptation to individual teaching situations the book is divided by subject matter into logical chapter divisions that can be assigned in the order appropriate for specific course students Each chapter stands by itself but the book is also an integrated whole It is easy to understand at first reading by beginning radio television majors or nonmajor elective students alike To give readers a complete picture of the field subjects such as ethics careers and rivals to U S commercial radio and television are included

are included **The Encyclopedia of Television, Cable, and Video** R.M. Reed, M.K. Reed, 2012-12-06 This is a major reference work about the overlapping fields of television cable and video With both technical and popular appeal this book covers the following areas advertising agencies associations companies unions broadcasting cable casting engineering events general production and programming *Home Area Networks and IPTV* Jean-Gabriel Rémy, Charlotte

Letamendia, 2013-03-04 The field of Home Area Networks HAN a dedicated residential subset of LAN technologies for home based use is fast becoming the next frontier for the communications industry This book describes the various technologies involved in the implementation of a HAN high speed Internet connections indoor implementations services software and

management packages It also reviews multimedia applications which are increasingly the most important and complex aspects of most HANs with a detailed description of IPTV technology It highlights the main technologies used for HANs information transmission by means of copper pairs coaxial cables fiber optics and Wi Fi radio systems as well as the software systems necessary for the processing and management of these data communications These technologies examples of which include the well known 802.11 family of standards and less widespread applications such as the HomePlug powerline standard are highly relevant to multimedia remote healthcare remote working energy and device management in the home The book is written for engineers working in the field or who are interested in high speed communication technologies and their actual or potential use in the home or in the small medium size enterprise SME commercial environment Digital TV Over Broadband Joan Van Tassel, 2013-10-08 Digital TV Over Broadband Harvesting Bandwidth offers a clear overview of how technological developments are revolutionizing television It details the recent shift in focus from HDTV to a more broadly defined DTV and to the increasing importance of webcasting for interactive television Digital Television examines the recent industry toward a combination of digital services including the use of the new bandwidth for additional channels of programming as well as some high definition television The book discusses the increasingly rapid convergence of telecommunications television and computers and the important role of the web in the future of interactive programming This new edition not only covers the new technology but also demonstrates practical uses of the technology in business models Audiences Ian Christie, 2025-10-01 This timely volume engages with one of the most important shifts in recent film studies the turn away from text based analysis towards the viewer Historically this marks a return to early interest in the effect of film on the audience by psychoanalysts and psychologists which was overtaken by concern with the effects of film linked to calls for censorship and moral panics rather than to understanding the mental and behavioral world of the spectator Early cinema history has revealed the diversity of film viewing habits while traditional box office studies which treated the audience initially as a homogeneous market have been replaced by the study of individual consumers and their motivations Latterly there has been a marked turn towards more sophisticated economic and sociological analysis of attendance data And as the film experience fragments across multiple formats the perceptual and cognitive experience of the individual viewer who is also an auditor has become increasingly accessible With contributions from Gregory Waller John Sedgwick and Martin Barker this work spans the spectrum of contemporary audience studies revealing work being done on local non theatrical and live digital transmission audiences and on the relative attraction of large scale domestic and mobile platforms Guide to Postproduction for TV and Film Barbara Clark, Susan Spohr, 2013-08-22 Are you an associate producer who needs to juggle projects and vendors while keeping on top of the latest trends and formats Or an independent filmmaker who can't afford a misstep in the crucial postproduction phase Take a step back and get a clear overview of the process This guide will show you how to navigate each step in taking a TV or film project from production to final delivery Start by getting a handle on the

critical issues of budgets and schedules From there you ll learn the smoothest way to manage dailies sound editing and completion Detailed instructions and checklists for film video and High Definition procedures will teach you new ways of doing things and help you avoid costly errors The second edition is fully updated and information packed There is extensive new material on high definition as it affects dailies editing and delivery The chapter on the film laboratory has been expanded further to include discussions on troubleshooting film damage and YCMs which are so important in maintaining film assets The latest information on film restoration digital technologies acquisitions and a chapter on what s on the horizon round out the update
