The Automotive Manufacturer ,1872      **A Corpus of Rembrandt Paintings VI** Ernst van de Wetering,2014-11-11 A revised survey of Rembrandt's complete painted oeuvre The question of which 17th century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime It is an issue that is still hotly disputed among art historians today The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait painter He also left pieces unfinished to be completed by others The question is how to determine which works were from Rembrandt's own hand Can we for example define the criteria of quality that would allow us to distinguish the master's work from that of his followers Do we yet have methods of investigation that would deliver objective evidence of authenticity To what extent do research techniques used in the physical sciences help Or are we after all still dependent on the subjective expert eye of the connoisseur The book provides answers to these questions Prof Ernst van de Wetering the author of our forthcoming book which deals with these questions has been closely involved in all aspects of this research since 1968 the year the renowned Rembrandt Research Project RRP was founded In particular he played an important role in developing new criteria for authentication Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand In this book he re attributes to the master a substantial number of unjustly rejected Rembrandts He also was closely involved in the re discovery of a considerable number of lost or completely unknown works by Rembrandt The verdicts of earlier specialists including the majority of members of the original RRP up to 1989 were based on connoisseurship the self confidence in one's ability to recognise a specific artist's style and hand Over the years Van de Wetering has carried out seminal research into 17th century studio practice and ideas about art current in Rembrandt's time In this book he demonstrates the fallibility of traditional connoisseurship especially in the case of Rembrandt who was par excellence a searching artist The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research Van de Wetering's account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account The catalogue section presents a chronologically ordered survey of Rembrandt's entire painted oeuvre of 336 paintings richly illustrated and annotated For all the paintings re attributed in this book extensive commentaries have been included that provide a multi faceted new insight into Rembrandt's world and the world of art historical research Rembrandt's Paintings Revisited is the concluding sixth volume of A Corpus of Rembrandt Paintings Volumes I V 1982 1986 1989 2005 2010 It can also be read as a revisionary critique of the first three Volumes published by the old RRP team up till 1989 and of Gerson's influential survey of Rembrandt's painted oeuvre of 1968 69 At the same time the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the

detailed catalogues published in the meantime by the various museums with collections of Rembrandt paintings This work of art history and art research should belong in the library of every serious art historical institute university or museum
