Situating Selves:

The Routledge Handbook of Cultural Discourse Studies Shi-xu, 2024-03-29 In response to the cultural challenges in society and scholarship this handbook presents the conceptions assumptions principles methods topics and issues in the studies of cultural forms of human communication cultural discourses by experts from around the world A culturalist programme in communication studies CS cultural discourse studies CDS as represented in this handbook is a new current of thought in human and social science and a form of academic activism but above all it is a fresh paradigm of research committed to enhancing cultural harmony and prosperity on the one hand and facilitating intellectual plurality and innovation on the other hand This handbook is the first of its kind it is concerned with the identities of and interactions between the world's diverse cultural communities through locally grounded and globally minded culturally conscious and critical approaches to their communicative practice Contributors apply such insights precepts and techniques not merely to discover and describe past and present communication but also to design and guide future communication This handbook is ideal for scholars and students interested in cultural aspects and issues of communication discourse as well as researchers of other fields looking to apply cultural discourse methods to their own projects

Constructing the Self in a Mediated World Debra Grodin, Thomas R. Lindlof, 1996-01-18 In today's media saturated world identities are no longer built solely within the close knit communities of family neighborhood school and work Today media are part of our world and therefore play an important role in the formulations of our identities or constructions of self In a truly postmodern mode Constructing the Self in a Mediated World not only brings together the usually segregated areas of interpersonal and mass communication but also incorporates works from scholars in sociology psychology and women's studies as well Each essay examines our understanding of self in a different context of mediated culture within a specific framework of interpretive theories such as critical theory social constructionist theory and feminism This volume provides insights into issues of self and identity in contemporary mediated culture Designed for advanced students and experienced researchers in communication both media and interpersonal sociology psychology and women's studies Constructing the Self in a Mediated World raises important questions and contributes greatly to its field

John Dewey and the Habits of Ethical Life Jason Kosnoski, 2010-09-23 This book uses John Dewey to articulate discursive practices that would help citizens form better intellectual and moral relationships with their fragmented shifting political environment These practices do not impart more or better information to citizens but instead consist in dialog exhibiting rhythms and patterns that increase their interest in inquiring how distant events and communities affect their individual lives The basis for these practices can be found in Dewey's claim that teachers can lead class discussions with particular aesthetic qualities that encourage students to expand the scale of the realm of events that they deem important to their lives The ability to forge moral and intellectual links with distant political events becomes all the more necessary in our current environment not only are individuals' lives increasingly affected by global

events but also such events constantly shift across an increasingly liquid social landscape comprised of decentralized institutions instantaneous communication and easy transportation Dewey saw early on how such aesthetics of society or its spatial and temporal qualities might undermine citizens understanding and concern for the larger public This concern for how the movement and location of elements of the social environment might affect citizen perception ties Dewey to many contemporary geographers economists and social theorists normally not associated with his work If Dewey s classrooms were to be reinterpreted as political associations and his teachers as organizers individuals discussing the origins of their seemingly local issues in such associations could forge passionate moral connections with the contemporary liquid public Subsequently they might begin to increasingly care for participate in global politics and seek solidarity with seemingly distant communities

Mapping the Edges and the In-between Nancy Nyquist Potter, 2009-06-25 Borderline Personality Disorder BPD is a diagnosis given to a significant number of people in the Western world Yet many of the core concepts symptoms that go with this diagnosis are questionable This book presents a compelling analysis of BPD arguing that it needs to be approached in a new light one that will benefit patients

Diagnosis as Cultural Practice Judith Felson Duchan, Dana Kovarsky, 2009-02-26 This book is about the doing and experiencing of diagnosis in everyday life Diagnoses are revealed as interactive negotiations rather than as the assigning of diagnostic labels The authors demonstrate through detailed discourse analyses how the diagnostic process depends on power and accountability as expressed through the talk of those engaged in the diagnostic process The authors also show that diagnostic decisions are not only made by professional experts trained in the art and science of diagnosis but they can also be made by anyone trying to figure out the nature of everyday problems Finally diagnostic reasoning is found to extend beyond typical diagnostic situations occurring in unexpected places such as written letters of recommendation and talk about the nature of communication Together the chapters in this book demonstrate how diagnosis is a communication practice deeply rooted in our culture The book is interdisciplinary and unusually broad in its focus The authors come from different experiential scholarly backgrounds Each of them takes a different look at the impact and nature of the diagnostic process The diagnoses discussed include autism Alzheimer s disease speech and language disorders and menopause The focus is not only on the here and now of the diagnostic interaction but also on how diagnoses and diagnostic processes change over time The book can serve as an undergraduate or graduate text for courses offered in various disciplines including communication sociology anthropology communication disorders audiology linguistics medicine and disability studies

Development of Self-Determination Through the Life-Course Michael L. Wehmeyer,Karrie A. Shogren,Todd D. Little,Shane J. Lopez,2017-02-16 This volume examines the developmental aspects of the general psychological construct of self determination The term refers to self vs other caused action to people acting volitionally as based on their own will Research conducted in the fields of psychology and education shows the importance of self determination to adolescent development and positive adult outcomes The first part of this volume presents an overview of theories and historical antecedents of the construct It looks at the role of self determination in major theories of human agentic behavior and of adolescent development and individuation The second part of the volume examines the developmental origins and the trajectory of self determination in childhood adolescence and adulthood and looks as aging aspects The next part presents studies on the evolutionary aspects individual differences and healthy

psychological development The last part of the book covers the development of causal and agentic capability *Self-Injury, Medicine and Society* Amy Chandler, 2016-09-23 This book provides an appreciative sociological engagement with accounts of the embodied practice of self injury It shows that in order to understand self injury it is necessary to engage with widely circulating narratives about the nature of bodies including that they are separate from yet containers of emotion Using a sociological approach the book examines what self injury is how it functions and why someone might engage in it It pays close attention to the corporeal aspects of self injury attending to the complex ways in which lived experience is narrated By interrogating the way in which healthcare and psychiatric systems shape our understanding of self injury *Self Injury Medicine and Society* aims to re invigorate traditional discourse on the subject Combining analytical theory with real life accounts this book provides an engaging study which is both thought provoking and informative It will appeal to an interdisciplinary readership and scholars in the fields of medical sociology and health studies in particular

Self-Deception's Puzzles and Processes Jason Kido Lopez, 2016-08-16 The contemporary literature on self deception was born out of Jean Paul Sartre s work on bad faith lying to oneself As time has progressed the conception of self deception has moved further and further away from Sartre s conception of bad faith In *Self Deception s Puzzles and Processes A Return to a Sartrean View* Jason Kido Lopez argues that this departure is a mistake and that we should return to thinking about self deception in a Sartrean fashion in which we are self deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves Since literally tricking ourselves cannot work we will always see through our own self deception after all self deception merely consists of the attempt to trick ourselves in this way Other scholars have rejected this notion of self deception historically dismissing it as paradoxical Lopez argues first that it isn t paradoxical and he further suggests that moving away from this notion of self deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories Indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self deception and the resulting plethora of accounts lead to a fragmented picture of self deception If however the Sartrean view isn t paradoxical then there was no need for the host of contradictory theories and most researchers on self deception have missed what was originally so intriguing about self deception that it like bad faith is the process of literally trying to trick oneself into believing what is false or unwarranted *Self Deception s Puzzles and Processes* will be of great interest to students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self deception **Self-Concept Clarity** Jennifer Lodi-Smith, Kenneth G. DeMarree, 2018-01-03 This welcome resource traces the evolution of self concept clarity and brings together diverse strands of research on this important and still developing construct Locating self concept clarity within current models of personality identity and the self expert contributors define the construct and its critical roles in both individual and collective identity and functioning The book examines commonly used measures for assessing clarity particularly in relation to the more widely

understood concept of self esteem with recommendations for best practices in assessment In addition a wealth of current data highlights the links between self concept clarity and major areas of mental wellness and dysfunction from adaptation and leadership to body image issues and schizophrenia Along the way it outlines important future directions in research on self concept clarity Included in the coverage Situating self concept clarity in the landscape of personality Development of self concept clarity across the lifespan Self concept clarity and romantic relationships Who am I and why does it matter Linking personal identity and self concept clarity Consequences of self concept clarity for well being and motivation Self concept clarity and psychopathology Self Concept Clarity fills varied theoretical empirical and practical needs across mental health fields and will enhance the work of academics psychologists interested in the construct as an area of research and clinicians working with clients struggling with developing and improving their self concept clarity

Self-Study of Practice as a Genre of Qualitative Research Stefinee Pinnegar, Mary Lynn Hamilton, 2009-04-05 Teacher educators live hectic lives at institutional and discipline boundaries Our greatest potential for influence is through developing relationships with others in our practice Our work is fundamentally relational and emotional We are obligated to the teachers we teach and the public students they teach Our practice exists in the midst of experience conflicting and often hostile boundaries and between what we know from research and what we understand from practice Self study of practice invites researchers to embrace the hectic and fragmented territory of practice as the space for study This book educates those who would like to explore practice in the methodology of self study It provides both a pragmatic and theoretic guide It grounds the research in ontology and establishes dialogue as the inquiry process It supports researchers through the use of frameworks to guide research and explication of strategies for conducting it

Aging and Self-Realization Hanne Laceulle, 2018-11-08 Dominant cultural narratives about later life dismiss the value senior citizens hold for society In her cultural philosophical critique Hanne Laceulle outlines counter narratives that acknowledge both potentials and vulnerabilities of later life She draws on the rich philosophical tradition of thought about self realization and explores the significance of ethical concepts essential to the process of growing old such as autonomy authenticity and virtue These counter narratives aim to support older individuals in their search for a meaningful age identity while they make society recognize its senior members as valued participants and moral agents of their own lives

Japanese Sense of Self Nancy R. Rosenberger, 1992 The essays in this collection look at how the Japanese see themselves and others in a variety of contexts and challenge many Western assumptions about Japanese society Through their own experiences and observations of Japanese life the authors explain how the Japanese define themselves and how they communicate with those around them They discuss what Westerners view as oppositions inherent within the Japanese community and demonstrate how the Japanese reconcile one with the other

Self-Consciousness in Modern British Fiction B. Miller, 2013-02-05 Using a cognitive approach to literature this book uncovers representations of self consciousness in selected modern British novels exposing it as complicating character

development Miller provides new readings of works by Conrad Joyce and D H Lawrence to demonstrate the emergence of a self who feels split from the world

Routledge International Handbook of Self-Control in Health and Well-Being

Denise de Ridder, Marieke Adriaanse, Kentaro Fujita, 2017-10-30 The ability to prioritise long term goals above short term gratifications is crucial to living a healthy and happy life We are bombarded with temptations whether from fast food or faster technologies but the psychological capacity to manage our lives within such a challenging environment has far reaching implications for the well being not only of the individual but also society as a whole The Routledge International Handbook of Self Control in Health and Wellbeing is the first comprehensive handbook to map this burgeoning area of research by applying it to health outcomes and personal well being Including contributions from leading scholars worldwide the book incorporates new research findings that suggest that simply inhibiting our immediate impulses isn't the whole story there may be more options to improve self control than simply by suppressing the ego Divided into six coherent sections the book provides an overview of the research base before discussing a range of interventions to help improve self control in different contexts from smoking or drinking too much to developing self control over aggression or spending money The only definitive handbook on this far reaching topic this essential work will appeal to researchers and students across health and social psychology as well as related health sciences

Theology, Psychology and the Plural Self

Léon Turner, 2016-02-17 Is the human self singular and unified or essentially plural This book explores the seemingly disparate ways that Christian theology and the secular human sciences have approached this complex question The latter have largely embraced the idea of the plural self as an inescapable even adaptive feature of psychological life Contemporary Christian theology by contrast has largely neglected recent psychological accounts of the naturalness of self plurality and has sought to reaffirm the self's unity in opposition to those postmodern theorists who would dismantle it Through an original analysis of recent theological and secular accounts of self and personhood this book examines the extent of the intertheoretical disparity and its broader implications for theology's dialogue with the human sciences in general and psychology in particular It explains why theologians ought to take questions about the plurality of self very seriously and how they overlap with many of the central concerns of contemporary theological anthropology including the notions of relationality particularity and human sinfulness Introducing a novel psychological framework to distinguish various understandings of self disunity the author argues that contemporary theology's blanket condemnation of self multiplicity is misconceived and identifies a possible means of reconciling theological and human scientific accounts

Self Definition

Teodros Kiros, 2019-10-10 Self Definition argues that sex gender and race are constructions by the ineffable self as it seeks to define its possibilities free of domination The self's embodiments are themselves performances of self definition Teodros Kiros supports his argument by a careful reading of the literature from both the Global South and Global North that spans figures works and eras from antiquity to our late modern present These readings demonstrate that race gender and sex are performed in the Global South radically differently

from in the Global North These three notions as markers of identity are fluid open and expansive and Kiros brilliantly shows this through inquiry into thought rooted in Egypt Ethiopia India and China By the time that the Global North forges possibilities of the self in the modern period race gender and sex become fixed Biology and anatomy become understood as destinies and the possibilities of the self are deeply constrained This book approaches case studies of key figures and movements chronologically and thematically and in doing so Kiros highlights the tensions between the openness of the Global South and the rigidity of the Global North through which human possibilities as exercises of self definition become clear under conditions of freedom Our views of self definition will forever be transformed after reading this important text
