Early Childhood Curriculum for All Learners Ann M. Selmi, Raymond J. Gallagher, Eugenia R. Mora-Flores, 2014-08-12
Early Childhood Curriculum for All Learners Integrating Play and Literacy Activities is designed to teach early childhood professionals about the latest research on play and early literacy and then to show them practical methods for adapting this research to everyday classroom practices that will encourage the development of learning skills The authors link solid play based research to specific developmentally appropriate practices By combining these two areas the text demonstrates that academic learning and play activities are highly compatible and that children can and do develop academic skills through play In addition the text focuses on socio dramatic play a recently acknowledged essential aspect of child initiated play interactions It provides specific strategies that link these interactive behaviors with the early academic skills needed for the initial primary grades Implementation of the information presented in this book will enable children to experience a richer transition into primary education classrooms

Hands On, Minds On Claire E. Cameron, 2018 A growing body of research indicates that three foundational cognitive skills executive function motor skills and spatial skills form the basis for children to make a strong academic behavioral and social transition to formal school Given inequitable early learning environments or opportunity gaps in the United States these skills are also a source of substantial achievement and behavioral gaps Hands On Minds On describes the importance of children s foundational cognitive skills for academic achievement in literacy and mathematics as well as their connections with other areas of school readiness including physical health social and emotional development and approaches to learning The author emphasizes how social relationships and interactions both in and outside the classroom encourage or constrain young children s development in these skills The book concludes with a summary of the growing evidence in favor of guided object play which teachers can introduce to children to exercise and strengthen foundational cognitive skills Teachers both novice and veteran are eager to learn how to apply brain research to their practice and Dr Cameron has offered some very real knowledge and support to this effort From the Foreword by Sharon Ritchie FPG Child Development Institute Research has accelerated in the last decade and Hands On Minds On deftly summarizes and integrates these exciting advances This is a must read for educators and policymakers Daniel T Willingham University of Virginia Offers educators an entry point into what developmental research is telling us about early childhood and how best to support our youngest learners Nora S Newcombe Temple University
