Small Town China Beatriz Carrillo Garcia, 2011-04-19 While much has been written about rural migrant workers experiences in the big cities population movements into China's vast network of towns and small cities has been largely neglected This book presents a detailed case study of rural migrant workers experiences in a small town in a north China county The author explores the processes and institutions that enable or preclude the social inclusion of rural workers into the town's socio economic system Inclusion and exclusion are assessed through an examination of rural workers immersion into the urban labour market their access to welfare benefits and to social services such as housing education and health The book proposes that outside the larger cities there are alternative accounts of urban social change and of the integration of rural migrant workers It stresses the fact that the particular socio economic structure of towns where the state owned share of the economy has been smaller and where consequently social and private forces have been more active allowed for a more open inclusion of rural workers Though shortcomings are still observed the book suggests that China's transformation may not necessarily result in dysfunctional and socially polarized urban environments This book will be of interest to students and scholars of China's rural migrant workers bottom up urbanization and small town development social policy and more broadly on contemporary social change in China *Migration and Small Towns in China* Bingqin Li, Xiansheng An, 2009

Local Elites in Post-Mao China Yingjie Guo, 2018-03-15 This book provides fresh insights into the study of Chinese elites at the county level and below By shifting the analytical focus onto the agency of elites at the local level and away from the institutional structures within which they operate it fills a number of significant gaps in the field In particular this book addresses the lacunae through an empirically rich and diverse set of case studies It proceeds from the premise that the study of local elites can be most fruitful through examining their relations with each other and with the groups that wield power in the community Particularly pertinent to the analyses are three major relations namely the relationship between the elites and their environment between particular types of elites and between the locality and the upper and lower scales Ultimately it concludes that these relations are not only essential to understanding local elites in post Mao China but also in accounting for socio political change and in distinguishing China from other types of societies As a study of local elites in China this book will be useful to students and scholars of Chinese politics political sociology and Chinese Studies in general
