In addition to rigorous examination of the scientific theory supporting conservation biology and its applications, this unique book includes a number of features which set it apart from others. These include its chapters on aquatic conservation, landscape ecology, and ecosystem management, and its direct explanation and invitation to students on how to enter the work of conservation as a professional and personal vocation. **National Parks and Rural Development** Gary E. Machlis, Donald Field, 2000-09 Protecting land in parks is often seen as coming at the expense of rural economic development. Yet recent events such as the contentious debate over the development of Canyon Forest Village on the south rim of the Grand Canyon suggest just the opposite: healthy natural systems can be enormously valuable to rural economies. *National Parks and Rural Development* offers a thorough examination of the interdependent roles of national parks and the economies of rural communities in the United States. Bringing together the thinking and views of economists, historians, sociologists, recreation researchers, and park managers, the book considers how those roles can be most effectively managed as it offers a wide-ranging review of history and important concepts in rural development and parks management, five case studies of rural development near national parks that identify lessons learned, principles applied, mistakes committed, and advances made, personal essays from leaders in the parks management field. For each section, the editors offer introductory discussions that provide context and highlight key points. The editors also provide a detailed conclusion which summarizes policy implications and presents specific recommendations for improving rural development and park management policies. Case studies include Cape Cod National Seashore, Alaskan parks and wilderness areas, Yellowstone National Park, the Grand Canyon, and three

parks in the Pacific Northwest Mt Rainier Olympic and North Cascades ational Parks and Rural Development is a unique synthesis and guide to solving conflicts between the needs of human communities and nature near federal lands It will be an important work for agency personnel nongovernmental organizations and students and scholars of rural economic development public policy environmental economics and related fields
