

Social Navigation and Security

- Fundamental approach:
 - Allow people to assess how a system matches their needs
 - Allow them to see the relationship between a system or information artifact and activities, either of their own or others.
- Application = 'space'
- People's act = history of action displayed in the space
- Three approach:
 - Show the history of a user's action
 - Show patterns of conventional use
 - Show activities of others within a system

Social Navigation In Information Space:

Social Navigation of Information Space Alan J. Munro, Kristina Höök, David Benyon, 2012-12-06 Social navigation is a vibrant new field which examines how we navigate information spaces in real and virtual environments how we orient and guide ourselves and how we interact with and use others to find our way in information spaces This approach brings a new way of thinking about how we design information spaces emphasising our need to see others collaborate with them and follow the trails of their activities in these spaces Social Navigation of Information Space is the first major work in this field and includes contributions by many of the originators and key thinkers It will be of particular interest to researchers and students in areas related to CSCW and human computer interaction As a thoroughly multi disciplinary topic it will also be of interest to researchers in cognitive psychology social psychology philosophy linguistics sociology architecture and anthropology

Designing Information Spaces: The Social Navigation Approach Kristina Höök, David Benyon, Alan J. Munro, 2012-12-06 That s a look at an array of social proxies The purpose was to make it clear that the concept of social proxy is quite general Social proxies can be designed to support a wide range of on line interactions whether they involve conversation or not They may be synchronous or asynchronous and they may be associated with activities which are an end in them selves e g auctions or activities which are simply a means to an end e g waiting in queues We believe that by providing a shared represen tation of the activity in which participants are involved social proxies can help create shared expectations shared experiences and can serve as a resource which participants can use to structure their individual and collective interactions That is at least our claim However it is important to note that except for the first the proxies described so far are concept pieces meaning that they haven t been implemented and deployed to real situations Now however we will turn to an implemented system and look at a real example 1 4 Experience The Babble System In the previous section we introduced the concept of social proxies and discussed examples illustrating the wide range of situations to which social proxies can be applied In this section we focus on our experience in designing implementing and studying a social proxy in the context of an on line system called Babble

Adaptive Hypermedia and Adaptive Web-Based Systems Vincent Wade, Helen Ashman, Barry Smyth, 2006-06-09 Here are the refereed proceedings of the 4th International Conference on Adaptive Hypermedia and Adaptive Web Based Systems AH 2006 held in Dublin Ireland June 2006 The book presents 22 revised full papers and 19 revised short papers together with abstracts of 3 keynotes 12 poster papers and 14 doctoral consortium posters Topics include pioneering theories techniques and innovative technologies to provide dynamic personalization adaptation and contextualization of hypermedia resources and services

Spaces of Interaction, Places for Experience David Benyon, 2022-06-01 Spaces of Interaction Places for Experience is a book about Human Computer Interaction HCI interaction design ID and user experience UX in the age of ubiquitous computing The book explores interaction and experience through the different spaces that contribute to interaction until it arrives at an understanding of

the rich and complex places for experience that will be the focus of the next period for interaction design The book begins by looking at the multilayered nature of interaction and UX not just with new technologies but with technologies that are embedded in the world People inhabit a medium or rather many media which allow them to extend themselves physically mentally and emotionally in many directions The medium that people inhabit includes physical and semiotic material that combine to create user experiences People feel more or less present in these media and more or less engaged with the content of the media From this understanding of people in media the book explores some philosophical and practical issues about designing interactions The book journeys through the design of physical space digital space information space conceptual space and social space It explores concepts of space and place digital ecologies information architecture conceptual blending and technology spaces at work and in the home It discusses navigation of spaces and how people explore and find their way through environments Finally the book arrives at the concept of a blended space where the physical and digital are tightly interwoven and people experience the blended space as a whole The design of blended spaces needs to be driven by an understanding of the correspondences between the physical and the digital by an understanding of conceptual blending and by the desire to design at a human scale There is no doubt that HCI and ID are changing The design of microinteractions remains important but there is a bigger picture to consider UX is spread across devices over time and across physical spaces The commingling of the physical and the digital in blended spaces leads to new social spaces and new conceptual spaces UX concerns the navigation of these spaces as much as it concerns the design of buttons and screens for apps By taking a spatial perspective on interaction the book provides new insights into the evolving nature of interaction design

The Adaptive Web Peter Brusilovski, Alfred Kobsa, Wolfgang Nejdl, 2007-04-24 This state of the art survey provides a systematic overview of the ideas and techniques of the adaptive Web and serves as a central source of information for researchers practitioners and students The volume constitutes a comprehensive and carefully planned collection of chapters that map out the most important areas of the adaptive Web each solicited from the experts and leaders in the field
