## **Social Portrait Of Europe September 1998:**

*Quantitative Methods in Social Science Research* Stephen Gorard, 2003-03-02 This clever scheme builds on Gorard's previous book *Quantitative Methods in Educational Research*. He has revised the original book in the light of experience and feedback and has reworked it so that it includes more social science examples. Four chapters are entirely new.

**Quantitative Methods in Educational Research** Stephen Gorard, 2010-07-01 This is a comprehensive guide to quantitative research rooted in the author's own teaching and research. In particular, it challenges both the student who does not do numbers and the student who does nothing but numbers and who therefore fails to interpret or challenge his/her results. The book shows how all educational researchers need to do quantitative research, even if only in the sense of reading other people's research findings. In fact, the book argues that the conventional distinction between primary and secondary research data is inadequate since there is enormous need/opportunity for conducting research through using and reinterpreting secondary data. This leads to one of the main selling points of the book: Gorard's idea of the idle researcher who makes valuable contributions to the research literature by using data gathered by other researchers. Changing

Educational Landscapes Dimitris Mattheou, 2010-04-08 Analyzing educational landscapes, the fundamental values, principles and institutions of the sector, is a highly complex and demanding task for any researcher. Like shifting desert sands, these aspects of education are in a constant state of flux, changing according to the unpredictable economic, social, cultural and geopolitical circumstances of late modernity. Key aspects of the intricate, fluid and multifarious contemporary setting can always escape the researcher's necessarily selective observation. The contributors to this book share the view that it is wise therefore to take note of other people's ideas, perceptions and perspectives to compare notes and reflect critically on them. Thus, the papers presented here are a critical and comparative analysis of today's changing educational landscapes. They are an exploration of some of the forces and factors that induce these changes and also examine some of their most significant implications. The work takes a fresh look at received ideology and institutional practices and delineates the increasingly internationalized educational discourses and policies. Among other things, the book discusses the obsession with quality in education and the alternative perceptions of educational equality, the rising concern at the obstacles to truly multicultural education and the debate about the epistemological foundations both of knowledge and knowledge production. Underlying all of the papers in the book is the authors' intention to enhance our understanding of educational change in this era of transition and to further our appreciation of its multifaceted expressions across the world. **Schools, Markets and Choice Policies**

John Fitz, Stephen Gorard, Chris Taylor, 2003-12-16 Choice and selection are now cornerstones of education policies wherever these have been shaped by market economics. Now as never before, schools can face uncertain futures because their survival is determined by external factors such as admission policies and parental preferences. Because of the link between schooling and housing and other public sector services, the implications of increasing choice extend well beyond education. Schools

Markets and Choice Policies brings together the findings of the most comprehensive research ever conducted into choice in secondary education and provides in depth context analysis and discussion In assessing the impact of choice policies not only upon the education system itself but also upon wider society it provides valuable insights into economic and social segregation A groundbreaking contribution to the debate on the role of choice and market economies in education this book is essential reading for anyone involved in determining or implementing education policy at all levels The Social Face of the Euro Dirk van der Werf,2003 **General catalogue of publications 2001** European Commission,2001 **Vatican II** Melissa J. now an established agenda for large companies with a new profession emerging that engages in the social and environmental contribution of business How has this agenda emerged over time What were the key events and actors How has this new movement of committed individuals been taking shape around the globe Insights into these questions come from a review of the first half of first decade of the 21st century The Corporate Responsibility Movement compiles Lifeworth's highly praised Annual Reviews of Corporate Responsibility from 2001 to 2005 It is introduced with a new overview by the lead author of those reviews Dr Jem Bendell in a piece that examines the trajectory of a new social movement in and around business At a time of searching questions about the future of finance Dr Bendell argues that a new concept of capital democracy is emerging from within the community of people working towards corporate responsibility which could be mainstreamed as a socially and environmentally enhanced system of economy He calls on professionals researchers and policy makers to embrace an ambitious agenda for corporate responsibility and develop greater insight into acting together as a movement for change This book is an essential resource for business libraries recording analysing and contextualising some of the key events issues and trends during this historic period in the development of the corporation Catalóg Bhliantúil Ireland.
