Henricks, David Kuschner, 2015-02-05 The Handbook of the Study of Play brings together in two volumes thinkers whose diverse interests at the leading edge of scholarship and practice define the current field. Because play is an activity that humans have shared across time place and culture and in their personal developmental timelines and because this behavior stretches deep into the evolutionary past no single discipline can lay claim to exclusive rights to study the subject. Thus this handbook features the thinking of evolutionary psychologists ethologists and biologists neuroscientists developmental psychologists psychotherapists and play therapists historians sociologists and anthropologists cultural psychologists philosophers theorists of music performance and dance specialists in learning and language acquisition and playground designers. Together but out of their varied understandings the incisive contributions to The Handbook take on vital questions of educational policy of literacy of fitness of the role of play in brain development of spontaneity and pleasure of well being and happiness of fairness and of the fuller realization of the self. These volumes also comprise an intellectual history retrospective looks at the great thinkers who have made possible the modern study of play. **The Sociology of Tourism** Yiorgos Apostolopoulos, Stella Leivadi, Andrew Yiannakis, 2013-04-15 The rapid expansion of the tourism industry has provided many economic benefits and affected every facet of contemporary societies including employment government

Education Mihaly Csikszentmihalyi,2014-08-08 The third volume of the collected works of Mihaly Csikszentmihalyi covers

his work on the application of flow in areas that go beyond the field of leisure where the concept was first applied Based on his personal experience with schooling and learning as well as that of many others and contrary to what Cicero claimed Csikszentmihalyi arrived at the conclusion that instead of taking pride in making the roots of knowledge as bitter as possible we should try to make them sweeter Just as flow became a popular and useful concept in voluntary activities it could likewise be applied in education with the end result of young people being more likely to continue learning not just because they have to but because they want to This volume brings together a number of articles in which Csikszentmihalyi develops ideas about how to make education and more generally the process of learning to live a good life more enjoyable Since theory is the mother of good practice the first eleven chapters are devoted to theoretical reflections Some are general and explore what it means to be a human being what it means to be a person when we look at life from the perspective of flow Others are more narrowly focused on such topics as consumption education teaching and learning They help laypeople reflect how they can arrange their lives in such a way as to leave a small ecological footprint while getting the most enjoyment The second section of the volume contains a dozen empirical articles on similar topics They deal with the development of identity and self worth with the formation of goals and motivation with loneliness and family life
