Subcommittee on Children, Family, Drugs and Alcoholism,1986 Internet Use and Psychological Well-Being Among Children and Adolescents Yangu Pan,Zhaojun Teng,Daniel Tan Lei Shek,Chun Chen,2024-01-22 Internet use e g smartphone use social media use is ubiquitous in our daily lives and plays an increasingly important role in human well being Today s adolescents and their parents spend significant amounts of time on technological devices such as smartphones especially during COVID 19 In this year new research shows that nearly half of American teenagers say they use the Internet almost constantly 95% of American teens have smartphones and about 54% of teens said it would be somewhat hard to give up social media Hence further research on the relationship between Internet use and psychological well being among children and adolescents is worth pursuing At the same time a new interest in this area of research is parental technoference which was defined as regular interruptions to real time face to face communications interactions or time spent together among family members because of parental use of technology Technoference has become a common phenomenon in many families with children and evidence has been identified that extended parental time on technological devices e g smartphones could have negative effects on parent child relationships and children s wellbeing For example parental phubbing is regarded as a typical parental technoference and this term is used widely in some countries around the world which has been demonstrated to be detrimental to their children s developmental outcomes and cause various psychological health problems **Youth at Risk** Ann Wolbert Burgess,1986 This book illustrates the strong link between missing and exploited children Burgess shows that physical and sexual abuse in the home is one of the primary reasons youth give for running away p vi *Street Woman* Eleanor Miller,1987-04 In this rich well written study Eleanor Miller analyzes the social organization of street hustling and the lives of the women involved in it Miller views hustling as illegal work prostitution fraud forgery embezzlement and larceny Using information garnered from life histories and interviews with 64 female street hustlers in Milwaukee she vividly describes a female underclass recruited to the world of the street for a substantial period of their lives Street Woman offers a challenging alternative to recent sociological studies that view the women s movement as directly linked to the increasing participation of women in property crime Miller shows that this increase in crime is a response to sustained poverty Thus many sociologists are out of touch with the typical female criminal in this country on both a demographic and personal level Typical female hustlers as their own words poignantly reveal are young poor minority women who have limited education and skills and who also have several children of their own They adopt characteristic interpersonal relationships and familial forms that insure their survival but which leave the youngsters at greater risk of being recruited to street life Street Woman is a work of great importance to sociologists and criminologists alike both in its ramifications for public policy and its explicit implications for further research Most important Miller s desire to render a more personal portrait to enable us to at least

recognize the individual in the picture painted of the group leaves the reader with haunting portrayals of the women who struggle to survive in the violent desperate drug ridden world of the street Author note Eleanor M Miller is Assistant Professor of Sociology at the University of Wisconsin Milwaukee *Lost from View* Nina Biehal, Fiona Mitchell, Jim Wade, 2003 Thousands of people are reported missing each year yet very little is known about who they are why they disappear and what happens to them Although the predicament of runaways and other missing children has a higher profile the issue of missing adults has been neglected in research and policy Drawing on almost 2000 missing persons cases the report explores vbTab who goes missing vbTab why people choose to go missing and how people can become missing in other circumstances vbTab the experiences of missing people while they are away and the risks that they may encounter vbTab how missing episodes are resolved vbTab how further developments in policy and practice may assist missing people and their families This highly topical report demonstrates that the social problems underpinning the missing issue cut across many areas of social policy This book will therefore be essential reading for policy makers practitioners and academics in the fields of criminal justice child and family welfare health and social work
