A Social Theory of the WTO J. Ford, 2003-08-19 Traditional theories suggest that developing countries lack influence in the trade regime In this text Jane Ford uses a social theory or constructivist approach to show that developing countries played a critical role in strengthening multilateralism in the World Trade Organization A Social Theory of the WTO J. Ford, 2003-08-19 Traditional theories suggest that developing countries lack influence in the trade regime In this text Jane Ford uses a social theory or constructivist approach to show that developing countries played a critical role in strengthening The Language of World Trade Politics Klaus Dingwerth, Clara multilateralism in the World Trade Organization Weinhardt, 2018-08-30 Outcomes in major multilateral trade negotiations are conventionally explained as resulting from interests weighted by trading power Offering a different overview of the concepts we use to talk about the international trade regime this edited collection puts the ideational foundation of world trade politics centre stage and critically examines the terms in which we make sense of world trade politics. The concepts used to make sense of world trade politics are often employed strategically making some aspects of reality visible and others invisible Reflecting upon ten key concepts from trade itself to protectionism and justice this book poses two broad questions first how and by whom have the meanings of different terms used to describe challenge and defend world trade politics been constructed Second how have the individual terms changed over time and with what consequences The editors and contributors draw on a broad range of theoretical approaches from post structuralism or cognitivism to normative theory shedding new light on why certain trade issues and agendas win out over others who benefits from the current system of trade governance and what contemporary challenges the World Trade Organization faces In doing so the book speaks to a growing and diverse constructivist literature in International Political Economy This book will be of interest to scholars students and policy professionals working within International Relations International Political Economy and economics Writing Global Trade Governance Michael Strange, 2013-08-15 Writing Global Trade Governance operationalises a key post structuralist methodology in order to expand understanding on the institution at the heart of the global political economy Despite the WTO's centrality and the growing popularity of methods utilizing discourse theory no other text has yet demonstrated how these two fields of learning can be productively combined The book seeks to move beyond existing literatures that assume the WTO to be a structure institution or normative framework in order to enquire into the discursive processes of identity formation that make the WTO both possible and contested The book criticises conventional approaches that treat critical civil society as distinct to the WTO arguing instead that it is only through including such social practices within the field of relations making the WTO that we can properly understand what makes the WTO work The book presents an empirical analysis of the discursive character of the present day WTO including its formation and operation and then moves on to evaluate how it is subject to change within a broader social context The final stage of the book seeks to discuss the impact of the findings on future research both on the

WTO and other institutions This work is a significant intervention in the literature on the World Trade Organization and the politics of global trade and social movements and will be of great interest to students and scholars of global governance discourse theory and international organizations Vietnam's New Order S. Balme, M. Sidel, 2016-01-26 This volume brings together distinguished international specialists on Vietnam and its reform process to explore the impact of reform in Vietnam on the Vietnamese state society and order and Vietnam's international and regional environment Global Trade Governance Ka Zeng, Wei Liang, 2013-12-13 China's historic accession to the World Trade Organization WTO in November 2001 not only represents an important milestone in the country's transition to a market economy and integration into the global economy but is also among the most important events in the history of the WTO and the multilateral trading system China and Global Trade Governance China's First Decade in the World Trade Organization provides us with some fresh empirical data to assess the country's behaviour in the liberal international economic regime Such an assessment is both timely and necessary as it can help us better understand China's role in the evolving structure of global economic governance in addition to shedding light on the broader debate about the implications of the rise of China for the international system Through a thorough examination of China's WTO compliance record and its experience in multilateral trade negotiations this book seeks to better understand the sources of constraints on China's behaviour in the multilateral trade institution as well as the country's influence on the efficacy of the World Trade Organization In doing so this project speaks directly to the following questions raised by China's unprecedented ascent in the international system Is China a rule maker rule follower or rule breaker in international regimes Is Beijing a responsible stakeholder capable of making positive contributions to global trade governance in the long term **The Power to Persuade** Angela Geck, 2024-06-03 The Power to Persuade provides an innovative and eye opening analysis of strategic arguing as a means of power in global politics Based on an empirical case study of arguing processes in the World Trade Organization WTO the book shows how discursive contexts institutional norms and procedures and unequal human resources condition who has the power to persuade While accounts of arguing in international relations are typically based on a notion of arguing as a power free mode of interaction oriented towards understanding Angela Geck shows how such an approach precludes the question of persuasive power Drawing on in depth interviews with Geneva diplomats and a document based analysis of the negotiations on two Doha Round issues the book examines the practices governing strategic arguing in the WTO and uncovers two sources of persuasive power firstly prevalent discourses and connected regime norms empower some actors over others secondly their ability to debate is conditioned by exclusionary procedures and unequal human resources Offering a grounded theory of strategic arguing in trade politics The Power to Persuade presents a novel analysis of the relationship between arguing and Routledge Handbook of International Organization Bob Reinalda, 2013-06-07 This Handbook brings together power scholars whose essays discuss significant issues with regard to international organization as a process and international

organizations as institutions Although the focus is on intergovernmental organizations IGOs non governmental organizations NGOs are discussed where relevant The handbook is divided into six parts Documentation Data Sets and Sources International Secretariats as Bureaucracies Actors within International Bureaucracies Processes within International Bureaucracies Challenges to International Organizations and Expanding International Architectures The state of the art articles are meant to encourage current and future generations of scholars to enjoy working in and further exploiting the field and are also of great interest to practitioners of international organization and global governance International Relations Theory and Regional Transformation T. V. Paul, 2012-02-23 A comprehensive treatment of regional transformation offering insights from different theoretical perspectives and generating a range of policy relevant ideas

<u>Transformations in Trade Politics</u> Silke Trommer, 2014-01-23 This book examines the evolution and application of participatory trade politics in West Africa and discusses the theoretical implications for political economy and global governance approaches to trade policy making The author traces the involvement of a network of West African global justice Non Governmental Organizations NGO local NGO and movement platforms and trade unions in the negotiations for an Economic Partnership Agreement with the European Union Building on this empirical analysis she develops a theoretical framework of trade policy formation that is not limited to conceptualizing trade as a policy field aimed exclusively at regulating exporting and importing activities in the global economy Instead she analyzes how material and ideational spheres interact in the way in which communities set the rules that enable them to trade across long distances Attempting to reconcile demands for inclusivity with current economic policy making the author reframes the way in which we theoretically pose questions of who makes trade policy decisions through which mechanisms and why trade policy making practices change or resist change Transformations in Trade Politics will be of interest to students and scholars of International Political Economy Global Governance Social Movement Studies International Economic Relations International Trade Relations African Politics The Politics of African International Development EU politics and EU African Relations Firm Interests Cornelia Woll, 2018-07-05 Firms are central to trade policy making Some analysts even suggest that they dictate policy on the basis of their material interests Cornelia Woll counters these assumptions arguing that firms do not always know what they want To be sure firms lobby hard to attain a desired policy once they have defined their goals Yet material factors are insufficient to account for these preferences. The ways in which firms are embedded in political settings are much more decisive Woll demonstrates her case by analyzing the surprising evolution of support from large firms for liberalization in telecommunications and international air transport in the United States and Europe Within less than a decade former monopolies with important home markets abandoned their earlier calls for subsidies and protectionism and joined competitive multinationals in the demand for global markets By comparing the complex evolution of firm preferences across sectors and countries Woll shows that firms may influence policy outcomes but policies and politics in turn influence business

demands This is particularly true in the European Union where the constraints of multilevel decision making encourage firms to pay lip service to liberalization if they want to maintain good working relations with supranational officials In the United States firms adjust their sectoral demands to fit the government s agenda In both contexts the interaction between government and firm representatives affects not only the strategy but also the content of business lobbying on global trade

A Dictionary of International Trade Organizations and Agreements Patrick Holden, 2011-05-28 This new title examines international trade organizations and the agreements that govern them Negotiating Trade in Uncertain Worlds Clara Weinhardt, 2019-11-22 This book shows how a constructivist account of bargaining sheds new light on the emergence of impasse situations in international trade negotiations. It uncovers the subtle ways in which misperceptions and the problems of overcoming them complicate negotiations It brings to the forefront misperceptions and sticky beliefs that complicate trade talks between the Global South and the Global North Empirically the book examines the recent negotiations of Economic Partnership Agreements between the European Union EU and West Africa 2002 2014 In doing so it enriches the study of negotiations of development oriented trade agreements in the context of a major North South partnership By exploring a constructivist perspective on game theory the author uncovers how the repeated impasse situations followed from the different games both sides expected to be playing The author shows that such misperceptions endured because they reflected deep seated normative disagreements not only over the effects of neo liberal trade reforms but also over how to structure EU Africa post colonial trade relations in the 21st century Comparing and contrasting both sides divergent perspectives helps us to see how trade negotiations are never just about economic interests but also about the re negotiation of the values and ideas that structure state interaction The book draws on a large set of qualitative primary data on EU West Africa trade negotiations Negotiating trade in uncertain worlds will be of great interest to students and scholars of international relations international political economy international trade international negotiations EU external relations EU Africa cooperation economic diplomacy international relations of the developing world and North South cooperation The WTO Dispute Settlement System Kati Kulovesi, 2011-09-01 Tensions between economic interests and environmental protection have assumed crisis proportions in awareness at every level of society In particular the World Trade Organization has become entangled in controversies related to legitimacy democracy environmental protection and fragmentation of international law fuelling a contentious debate on the use or abuse of environmental norms at the WTO To a greater degree than any comparable treatment this book focuses on the role of the WTO dispute settlement system in addressing trade environment conflicts Highlighting the ways in which environmental issues challenge the legitimacy of WTO jurisprudence it considers such relevant core issues as the following challenges posed to the WTO by so called linkage issues such as environmental protection labour and investment to what extent the WTO can apply rules of international law e q environmental ones that are not contained in the WTO agreements and concerns over the Dispute Settlement System's lack

of democratic accountability in matters of great public interest The study analyses in detail the role of international environmental law in three key WTO cases namely the Shrimp Turtle Hormones and Biotech disputes This deeply informed and thoughtful book is of special importance for its proposals on how the WTO dispute settlement system can improve its legitimacy while respecting the limits of its mandate It will be welcomed by international trade attorneys environmental lawyers concerned academics and students and government officials in both trade and environmental policy Powers in World Trade Diplomacy C. Efstathopoulos, 2015-03-01 Examining how leading developing countries are increasingly shaping international economic negotiations this book uses the case studies of India and South Africa to demonstrate the ability of states to exert diplomatic influence through different bargaining strategies and represent the interests of the developing world in global governance Transnational Governance Scott Mann, 2016-02-17 As globalization continues to spread and evolve so nation states attempt to govern financialization tax evasion corruption terrorism civil and military conflicts and environmental dangers social polarization and the complexities in human rights implementation by institutional and transnational means This volume discusses these issues from different legal perspectives and highlights the challenges of governing human activity in an age of remarkable interconnectedness Covering a broad range of policy areas and analysis of emerging forms of governance from liberal to critical and Marxist the chapters are legal in their approach and form an important contribution to the growing study of emergent forms of authority coordination and power developing in response to the challenges presented by some of the key contemporary governance issues in the first half of the twenty first Governments, Non-State Actors and Trade Policy-Making Ann Capling, Patrick Low, 2010-09-09 One of the most century pressing issues confronting the multilateral trade system is the challenge posed by the rapid proliferation of preferential trade agreements Plenty has been written about why governments might choose to negotiate preferentially or multilaterally but until now it has been written almost exclusively from the perspective of governments We know very little about how non state actors view this issue of forum choice nor how they position themselves to influence choices by governments about whether to emphasize PTAs or the WTO This book addresses that issue squarely through case studies of trade policy making and forum choice in eight developing countries Chile Colombia Mexico South Africa Kenya Jordan Indonesia and Thailand The case studies are based on original research by the authors including interviews with state and non state actors involved in the trade policy making process in the eight countries of this study **Expert Knowledge in Global Trade** Erin Hannah, James Scott, Silke Trommer, 2015-08-27 This book explores tensions in global trade by examining the role of experts in generating disseminating and legitimating knowledge about the possibilities of trade to work for global development To this end contributors assess authoritative claims on knowledge They also consider structural features that uphold trade experts monopoly over knowledge such as expert language and legal and economic expertise The chapters collectively explore the tensions between actors who seek to effect change and those who work to uphold the status quo exacerbate

asymmetries and reinforce the dominant narrative of the global trade regime The book addresses the following key overarching research questions Who is considered to be a trade expert and how does one become a knowledge producer in global trade How do experts acquire disseminate and legitimate knowledge What agendas are advanced by expert knowledge How does the discourse generated within trade expertise serve to close off alternative institutional pathways and modes of thinking What potential exists for the emergence of more emancipatory global trade policies from contemporary developments in the field of trade expertise This book will be of great interest to students and scholars of IPE Trade Politics Power Transition in the Anarchical Society Tonny Brems International Relations and International Organizations Knudsen, Cornelia Navari, 2022-07-09 This book examines the ongoing power transition and its ramifications for world order from an international society perspective In that perspective the outcome of big changes in the distribution of power is a matter of socialization rather than structural determination or the resilience of the so called Liberal world order Consequently the key question of this book is how the ongoing power transition affects and is affected by the social institutions of world order including sovereignty the balance of power international law diplomacy trade humanitarian intervention national self determination and environmental stewardship The guiding theoretical assumption of the book is that power transition stimulates fundamental institutional change rather than major conflict or a breakdown of international order while international organizations are key arenas for the realization and negotiation of such changes not the victims of hegemonic retreat The argument is pursued in sections on rising and declining powers Anglo America Russia China and the EU among others consequences for the fundamental social institutions and changes in international organizations globally and regionally In combination the chapters reveal the contours of the coming world order **Contending Legitimacy in** World Politics Bronwyn Winter, Lucia Sorbera, 2018-10-19 Legitimacy along with security and democracy is arguably one of the most widely used global buzzwords of the new millennium Yet the idea of political legitimacy is not new and has been constructed in different ways at different moments in history This book problematizes this notion from various contextual standpoints disciplinary and theoretical perspectives Taking a comparative transnational and bottom up approach to the study of political legitimacy this book sheds light on multiple perceptions by different actors institutions civil society majoritarian and minority subjects analysing the notion of political legitimacy from a critical perspective Questioning received wisdom or one size fits all analyses it leads to a reassessment of the link between legitimacy and sovereignty and emphasises the demand by transnational civil society to go beyond identity politics which produce logics of violence This book was originally published as a special issue of Global Discourse
