A *Violent History of Benevolence* Chris Chapman,A.J. Withers,2019-03-14 A Violent History of Benevolence traces how normative histories of liberalism progress and social work enact and obscure systemic violences Chris Chapman and A J Withers explore how normative social work history is structured in such a way that contemporary social workers can know many details about social work s violences without ever imagining that they may also be complicit in these violences Framings of social work history actively create present day political and ethical irresponsibility even among those who imagine themselves to be anti oppressive liberal or radical The authors document many histories usually left out of social work discourse including communities of Black social workers who among other things never removed children from their homes involuntarily the role of early social workers in advancing eugenics and mass confinement and the resonant emergence of colonial education psychiatry and the penitentiary in the same decade Ultimately A Violent History of Benevolence aims to invite contemporary social workers and others to reflect on the complex nature of contemporary social work and specifically on the present day structural violences that social work enacts in the name of benevolence

Spergel,1995-06-01 Every day there are new stories of gang related crime from the proliferation of illegal weapons in the

streets and children dealing drugs in their schools to innocent bystanders caught in the crossfire of never ending gang wars Once considered an urban phenomenon gang violence is permeating American life spreading to the suburbs and bringing the problem closer to home for much of America The government schools social agencies and the justice system are conspicuous by their sporadic interest in the subject and have failed to develop effective policies and programs Existing social support mechanisms and strategies for suppressing violence have often been unsuccessful And state and federal policy is largely nonexistent In *The Youth Gang Problem A Community Approach* Irving Spergel provides a systematic analysis of youth gangs in the United States Based on research historical and comparative analysis and agency documents and the author s extensive first hand experience the work explores the gang problem from the perspective of community disorganization especially population movement and the plight of the underclass It examines the factors of gang member personality gang dynamics criminal organization and the influence of family school prisons and politics as well as the response of criminal justice agencies and community groups Spergel describes techniques used by social agencies schools employment programs criminal justice agencies and grass roots organizations for dealing with gangs and recommends strategies that emphasize the use of local resources planning and collaborative procedures There is no single strategy and no easy solution to the youth gang problem in the United States There are however substantial steps we can take and they must be honestly and systematically tested Offering a practical and alternative approach to a serious social problem *The Youth Gang Problem A Community Approach* is a major and long awaited contribution to this dilemma It is required reading for criminal justice personnel school staff social workers policy makers students and scholars of urban and organizational sociology and the general reader concerned with the youth gang problem and how to control intervene and prevent it

Zapf, 2009 This ground breaking new work provides a detailed and extensive comparison of how the physical environment has been conceptualized in social work and other professions and offers a new and attractive foundational metaphor for social work The author acknowledges the need for greater awareness and action regarding environmental impacts and the book promotes more comprehensive notions of responsibility identity and stewardship that lead to a dynamic metaphor of people as place as the foundation for relevant social work practice in the early 21st century Why is that a profession with a declared focus on person in environment has been so silent on the environmental crisis Mainstream social work theory has

narrowed the understanding of environment to include merely the social environment but this approach is no longer sufficient for participation in multi disciplinary efforts to tackle urgent environmental issues Transformative notions of responsibility identity and stewardship have been developed on the fringes of our professional community rural remote social workers Aboriginal social workers and international and spiritual social workers They must now move to the core of the profession *The Road to Social Work and Human Service Practice with Online Study Too* Lesley
