Calculating the Social Cost of Illicit Drugs Pierre Kopp, Philippe Fenoglio, Co-operation Group to Combat Drug Abuse and Illicit Trafficking in Drugs (Pompidou Group), Council of Europe, 2001-01-01. Social cost estimates are potentially a valuable source of informing policy makers on the impact of prevention, treatment and law enforcement strategies. However, estimating the social costs of illegal drug use poses a methodological challenge given the difficulty of quantifying the link between drugs and their negative consequences and in assigning a monetary value to items that do not have market value. This study presents methodological guidance on developing indicators to calculate the social cost of drug abuse mainly through a cost of illness approach. The document also contains two case studies of research projects in France that have applied a social cost analysis to the use of alcohol and tobacco and to illicit drugs.
