Activism on the Web Veronica Barassi, 2015-05-22 Activism on the Web examines the everyday tensions that political activists face as they come to terms with the increasingly commercialized nature of web technologies and sheds light on an important yet under investigated

dimension of the relationship between contemporary forms of social protest and internet technologies Drawing on anthropological and ethnographic research amongst three very different political groups in the UK Italy and Spain the book argues that activists everyday internet uses are largely defined by processes of negotiation with digital capitalism These processes of negotiation are giving rise to a series of collective experiences which are defined by the tension between activists democratic needs on one side and the cultural processes reinforced by digital capitalism on the other In looking at the encounter between activist cultures and digital capitalism the book focuses in particular on the tension created by self centered communication processes and networked individualism by corporate surveillance and data mining and by fast capitalism and the temporality of immediacy Activism on the Web suggests that if we want to understand how new technologies are affecting political participation and democratic processes we should not focus on disruption and novelty but we should instead explore the complex dialectics between digital discourses and digital practices between the technical and the social between the political economy of the web and its lived critique

Ortner presents an ethnographic study of Brave New Films a nonprofit film production company that makes documentaries intended to mobilize progressive grassroots activism Ortner positions the work of the company within a tradition of activist documentary filmmaking and within the larger field of alternative media that is committed to challenging the mainstream media and telling the truth about the world today The company's films cover a range of social justice issues with particular focus on the hidden workings of capitalism racism and right wing extremism Beyond the films themselves Brave New Films is also famous for its creative distribution strategies All of the films are available for free on YouTube Central to the intention of promoting political activism the films circulate through networks of other activist and social justice organizations and are shown almost entirely in live screenings in which the power of the film is amplified Ortner takes the reader inside both the production process and the screenings to show how a film can be made and used to mobilize action for a better world

Policy Worlds Cris Shore, Susan Wright, Davide Però, 2011-04-01 There are few areas of society today that remain outside the ambit of policy processes and likewise policy making has progressively reached into the structure and

fabric of everyday life An instrument of modern government policy and its processes provide an analytical window into systems of governance themselves opening up ways to study power and the construction of regimes of truth This volume argues that policies are not simply coercive constraining or confined to static texts rather they are productive continually contested and able to create new social and semantic spaces and new sets of relations Anthropologists do not stand outside or above systems of governance but are themselves subject to the rhetoric and rationalities of policy The analyses of policy worlds presented by the contributors to this volume open up new possibilities for understanding systems of knowledge and power and the positioning of academics within them

Neoliberalism, Social Exclusion, and Social Movements , Donna L. Chollett, 2013-10-10 Neoliberalism Social Exclusion and Social Movements critically examines struggles for social justice in an era of neoliberal globalization Chollett perceptively elucidates the intertwining of debt restructuring the debacle of privatization NAFTA generated distortions in the sugar market and social and economic exclusion of Mexican sugarcane growers and mill workers The enclosure of community commons is but one of the devastating impacts of neoliberal policies that generated social movements across Latin America and beyond Closure of one of Michoacán Mexico's five sugar mills following privatization brought unemployment and economic havoc to the region This region is unique in that it is the only locality where a social movement repossessed the closed sugar refinery and created a cooperative worker run workplace The book offers a historically contextualized globally situated and ethnographically grounded analysis of the social movement as sugarcane growers and mill workers challenged the end to their way of life as they knew it It takes the reader into the very real lives of movement participants their aspirations struggles and accommodations Chollett skillfully peels back the layers of this social movement as activists sought to remake their own history but under circumstances that did not in the end ensure social justice The author demonstrates empathy for collective struggles confronting the ravages of neoliberal globalization yet explodes the myth that intuitively exalts social movements as morally noble forces for democratization and solidarity She offers a critical perspective on the internal factions and lack of democratization of a social movement gone awry and presents a sorely needed critique of social movement theory While focusing on a particular social movement this book carries wide applicability for all social movements concerned with social justice in an era of enduring neoliberalism It is essential reading for students academics activists and policy makers concerned with global inequalities

Race Rights Reparations Fernne Brennan, 2017-07-14 This book considers institutional racism as a problem that exists within modern societies Its roots lie with the transatlantic slave trade and slavery and the solution involves ridding society of the problem It is argued here that first there needs to be an acceptance of its existence then developing the tools needed to deal with it and finally to implement those tools so that institutional racism can be permanently removed from society The book has four themes the first considers the nature of institutional racism the second theme looks at instances of institutional racism through matters such as deaths in custody and skin lightening the third considers the concept of reparations and the final area looks at the

development of social movements as a way of pushing institutional racism up the political agenda The development of a social movement is part of a social discourse which would for example push mentoring as a form of reparations There is a need for more research on the manifestations of institutional racism and this book is part of that discourse It is argued that the legacy of the slave trade and slavery is continuing and contemporary through the presence of institutional racism in society This problem has not been addressed through legislation and policies devised to combat racial discrimination Institutional racism needs to be understood as being located in the processes and procedures of societal institutions
