SpencerWood,2013-06-29 Historical archaeology has made great strides during the last two decades Early archaeological reports were dominated by descriptions of features and artifacts while research on artifacts was concentrated on studies of topology technology and chronology Site reports from the 1960s and 1970s commonly expressed faith in the potential artifacts had for aiding in the identifying socioeconomic status differences and for understanding the relationships between the social classes in terms of their material culture An emphasis was placed on the presence or absence of porcelain or teaware as an indication of social status These were typical features in site reports written just a few years ago During this same period advances were being made in the study of food bone as archaeologists moved away from bone counts to minimal animal counts and then on to the costs of various cuts of meat Within the last five years our ability to address questions of the relationship between material culture and socioeconomic status has greatly expanded The essays in this volume present efforts toward measuring expenditure and consumption patterns represented by commonly recovered artifacts and food bone These patterns of consumption are examined in conjunction with evidence from documentary sources that provide information on occupations wealth levels and ethnic affiliations of those that did the consuming One of the refreshing aspects of these papers is that the authors are not afraid of documents and their use of them is not limited to a role of confirmation

Islands in the Street Martin Sanchez-Jankowski,1991 From the Introduction The overall goal of the research project was to understand the gang phenomenon in the United States In order to accomplish this goal I thought it necessary to understand what was similar in the way all gangs behaved and what was idiosyncratic to certain gangs In addition I thought it was also necessary to understand why certain gangs grew others declined but lingered on and others declined and died What follows is an explanation of the research design the method of data gathering the method of data analysis and presentation and some ethical issues related to the research Past research on gangs had for the most part focused on gangs in one section of a city gangs in one city or gangs of one ethnic group In order to understand the nature of the gang as an organization and the gang phenomenon in general I believed it was necessary to undertake a comparative study This was the only way to understand what gangs have in common with each other and what is idiosyncratic to particular gangs Living on the Edge Mark R. Rank,1994 Exploring the lives of a wide range of individuals and families

Living on the Edge depicts a side of the welfare experience rarely seen and dispels the myth that only the urban underclass the center of most policy debate struggles on welfare Rank's juxtaposition of numbers and faces alerts us to the fact that welfare recipients share much in common with the rest of the population His frank analysis allows us to see beyond the common biases to the fundamental constraints and forces in our society that push so many people to life on the edge

Insufficient Funds Hung Cam Thai, 2014-04-09 Every year migrants across the globe send more than 500 billion to relatives in their home countries and this circulation of money has important personal cultural and emotional implications for the immigrants and their family members alike Insufficient Funds tells the story of

how low wage Vietnamese immigrants in the United States and their poor non migrant family members give receive and spend money Drawing on interviews and fieldwork with more than one hundred members of transnational families Hung Cam Thai examines how and why immigrants who largely earn low wages as hairdressers cleaners and other invisible workers send home a substantial portion of their earnings as well as spend lavishly on relatives during return trips Extending beyond mere altruism this spending is motivated by complex social obligations and the desire to gain self worth despite their limited economic opportunities in the United States At the same time such remittances raise expectations for standards of living producing a cascade effect that monetizes family relationships Insufficient Funds powerfully illuminates these and other contradictions associated with money and its new meanings in an increasingly transnational world
