Social Stratification & Inequality

SOCIAL STRATIFICATION & INEQUALITY

- ▶ **Social Inequality** refers to any differences that result in some people having more socially valued characteristics than others (Holborn & Langley 2002, 6).
- ▶ **Social Stratification** is the hierarchical ordering of groups in society (Haralambos & Holborn 2000).
- ▶ So groups are put into different categories (based on wealth, power, prestige, colour, etc) and placed in an order or ranked at different levels/strata.

Social Class and Stratification Rhonda F. Levine, 2006 Bringing together various statements on social stratification this collection offers contributions to debates on the nature of race class and gender inequality

Introducing Social Stratification Kasturi DasGupta, 2015 Does everyone in the US have an equal chance to make it What explains the enduring power of racism and sexism How does our sociopolitical system generate inequality These are just a few of the questions explored in this accessible introduction to the complex problem of social stratification Kasturi DasGupta clearly explains the social and economic mechanisms that serve to preserve and even deepen social stratification in the US Enriched with case studies and examples throughout her text is carefully designed both to engage students and to help them see past cultural myths to grasp the underpinnings and consequences of social inequality

The Shape of Social Inequality David Bills, 2005-08-24 This volume brings together former students colleagues and others influenced by the sociological scholarship of Archibald O Haller to celebrate Haller's many contributions to theory and research on social stratification and mobility All of the chapters respond to Haller's programmatic agenda for stratification research A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary second that we identify the individual and collective consequences of the different states and rates of change of such structures and third seeing that some degree of stratification seems to be present everywhere that we identify the factors that make stratification structures change The contributors to this Festschrift address such topics as the changing nature of stratification regimes the enduring significance of class analysis the stratifying dimensions of race ethnicity and gender and the interplay between educational systems and labor market outcomes Many of the chapters adopt an explicitly cross societal comparative perspective on processes and consequences of social stratification The volume offers both conceptually and empirically important new analyses of the shape of social stratification

Social Stratification David B. Grusky, 2018-05-04 The book covers the research on economic inequality including the social construction of racial categories

the uneven and stalled gender revolution and the role of new educational forms and institutions in generating both equality and inequality

Social Stratification David B Grusky, 1994-08-29 The field of stratification is being transformed and reshaped by advances in theory and quantitative modeling as well as by new approaches to the analysis of economic racial and gender inequality Although these developments are revolutionary in their implications until now there has been no comprehensive effort to bring together the classic articles that have defined and redefined the contours of the field In this up to date anthology the history of stratification research unfolds in systematic fashion with the introductory articles in each section providing examples of the major research traditions in the field and the concluding essays commissioned from leading scholars providing broader programmatic statements that identify current controversies and unresolved issues The resulting collection of articles both celebrates the diversity of theoretical approaches and reveals the cumulative nature of ongoing research This comprehensive reader is designed as a primary text for introductory courses on social stratification and as a supplementary text for advanced courses on social classes occupations labor markets or social mobility The following types of questions and debates are addressed in the six sections of the reader 1 Is stratification inevitable Do the recent experiments with destratification in Eastern Europe and elsewhere provide new insights into the functionalist theory of inequality 2 Can we identify a set of organized and cohesive social classes in advanced industrial societies Does it make sense to refer to a ruling class a political class or a power elite in these societies 3 Are the basic contours of occupational mobility the same within all advanced industrial societies Have the new structuralists led us astray in our attempts to understand the sources and causes of occupational attainment 4 Are there fundamental differences across social classes in styles of life patterns of consumption and attitudes toward work Are these class specific cultures attenuating as we move into advanced industrialism 5 Is there an emerging underclass in America What are the principal sources of racial ethnic and gender inequality 6 Can we identify a teleological dynamic driving the development of stratification systems Are new forms of stratification and inequality emerging as Eastern Europe enters its postsocialist stage The volume offers essential reading for undergraduates who need an introduction to the field for graduate students who wish to broaden their understanding of stratification research and for advanced scholars who seek a basic reference guide Although most of the selections are middle range theoretical pieces suitable for introductory courses the anthology also includes advanced contributions on the cutting edge of research The editor outlines a modified study plan for undergraduate students requiring a basic introduction to the field

Social Stratification and Inequality Harold Kerbo, 2011-01-25 The 8th edition of Social Stratification and Inequality continues to provide a comprehensive up to date exploration of the economic and social divisions in human societies Extensive comparative information as well as an overview of how social stratification has changed and evolved over time gives readers a global perspective on class conflict Praised for its thorough research and scholarship Social Stratification and Inequality includes current statistics and the latest trends in the field

Class Inequality and Political Order Frank

Parkin,1971 All societies are unequal but some are more unequal than others How can we account for the persistence of class and status differences in the modern industrial world and for the variations that we find from one country to another Frank Parkin confronts these problems with a careful appraisal of the influence of working class movements political ideologies and the agencies of moral control He offers a lucid comparison of the situation in capitalist and socialist countries and raises some provocative questions about the compatibility of democracy and equality No student of society can read Class Inequality and Political Order without being forced to do some fresh thinking and no one can fail to enjoy reading it for it is excellently written without any of the unnecessary jargon that so often disfigures works of this kind *Structured social inequality*,1976 Structured Social Inequality Celia Stopnicka Heller,2017-05-25 Excerpt from Structured Social Inequality A Reader in Comparative Social Stratification Among the earliest written thoughts and judgments about social inequality were those Of the Hebrew prophets who denounced the excesses Of the rich and mighty And as could easily be guessed because there is hardly a subject that cannot be traced to them Plato and Aristotle paid attention to this phenomenon Plato was preoccupied with the conception Of a society in which social inequality would correspond perfectly to the inherent inequality of men Thus his Republic is a utopian society where each man assumes the occupation for which he is best fitted Aristotle the great classifier gave us the scheme Of three classes present in all states One class is very rich another very poor and a third is a mean 7 Knowing his preference for the mean in all things it is not surprising that he thought the middle class the best of the three and those states possessing a large middle class the best administered In his Politics we also find differing dichotomous schemes One is the basic division Of people everywhere into free and slave and the other is the division Of every population into those who work and those who do not About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Social Inequalities and Occupational Stratification** Paul Lambert,Dave Griffiths,2018-04-18 This book explores how structures of social inequality are linked to the social connections that people hold The authors focus upon occupational inequalities where they see for example that the typical friendship patterns of people from one occupation are often very different to those of people from another Social Inequalities and Occupational Stratification leverages empirical data about differences in social connections to chart structures of social distance and social inequality Several of its chapters provide coverage of the long standing Cambridge Social Interaction and Stratification scale CAMSIS project and its approach to analysing social interaction patterns in terms of a single dimension related to social inequality *Income Inequality and Social Stratification*

Joseph Turek, 2008 Rapid technological advances in communication data processing and transportation have made possible the integration of global markets on an unprecedented scale The world has become smaller our days have become shorter and competition between firms and across nations has intensified The economic forces set in motion by globalization have blurred national boundaries and rendered concepts such as Made in America utterly meaningless And yet ironically as the economic ties that bind us pull us closer together we become increasingly aware of the vast gulf that separates us The world's citizens many of whom have grown up watching American television and listening to American music can not help but notice the tremendous differences that separate nations We conduct business in virtual meetings and communicate instantaneously over immense distances but are becoming increasingly insulated from one another by the technology that fuels our interaction This is the world in which we live today But income inequality and social stratification are not new to the 21st century they have existed in all cultures countries and stages of economic development This volume draws together a collection of classical readings from economics political science sociology and philosophy to shed light on the fundamental nature of diversity in society From Adam Smith to Thorstein Veblen from Milton Friedman to Karl Marx and from Henry Thoreau to W E B Du Bois these selections will challenge your thinking on important social problems that continue to command national and international attention
