Culture and Agency Margaret Scotford Archer, 1996-09-26 Margaret Archer's Culture and Agency was first published in 1988 and proved a seminal contribution to social theory and the case for the role of culture in sociological thought Described in Sociological Review as a timely and sophisticated treatment the book showed that the problems of culture and agency on the one hand and structure and agency on the other could be solved using the same analytical framework In this revised edition of Culture and Agency Margaret Archer contextualises her argument in 1990s cultural sociology and links it explicitly to her latest book Realist Social Theory The Morphogenetic Approach Cambridge University Press 1995
An Essay on Culture Bennett M. Berger, 1995-01-01 What Berger has done is to synthesize a vast amount of material from an enormous literature he knows well and given us the fruits of a lifetime of thinking about these problems Howard Becker author of Art Worlds

Structure, Culture and Agency Tom Brock, Mark Carrigan, Graham Scambler, 2016-11-10 Professor Margaret Archer is a leading critical realist and major contemporary social theorist. This edited collection seeks to celebrate the scope and accomplishments of her work, distilling her theoretical and empirical contributions into four sections which capture the essence and trajectory of her research over almost four decades. Long fascinated with the problem of structure and agency, Archer's work has constituted a decade-long engagement with this perennial issue of social thought. However, in spite of the deep interconnections that unify her body of work, it is rarely treated as a coherent whole. This is doubtless in part due to the unforgiving rigour of her arguments and prose, but also a byproduct of sociology's ongoing compartmentalisation. This edited collection seeks to address this relative neglect by collating a selection of papers spanning Archer's career, which collectively elucidate both the development of her thought and the value that can be found in it as a systematic whole. This book illustrates the empirical origins of her social ontology in her early work on the sociology of education, as well as foregrounding the diverse range of influences that have conditioned her intellectual trajectory: the systems theory of Walter Buckley, the neo-Weberian analysis of Lockwood, the critical realist philosophy of Roy Bhaskar, and more recently her engagement with American pragmatism and the Italian school of relational sociology. What emerges is a series of important contributions to our understanding of the relationship between structure, culture, and agency. Acting to introduce and guide readers through these contributions, this book carries the potential to inform exciting and innovative sociological research.

Structure, Content and Meaning of Organizational Networks Peter Groenewegen, Julie E. Ferguson, Christine Moser, John Mohr, Stephen P. Borgatti, 2017-10-12 This volume explores recent advances in network research, strengthening theorizing on social structures and meaning in and between organizational networks. The volume will interest researchers seeking to explain organizational phenomena through the analysis of communications and information from archival and secondary electronic sources.

Handbook of the Sociology of Morality, Volume 2 Steven Hitlin, Shai M. Dromi, Aliza Luft, 2023-10-25 This handbook articulates how sociology can re-engage its roots as the scientific study of human moral systems, actions, and interpretation. This second volume builds on the successful original volume published in 2010, which contributed to the initiation of a new section of the American Sociological Association (ASA), thus growing the field. This volume takes sociology back to its roots over a century ago when morality was a central topic of work and governance. It engages scholars from across subfields in sociology, representing each section of the ASA, who each contribute a chapter on how their subfield connects to research on morality. This reference work appeals to broader readership than was envisaged for the first volume, as the relationship between sociology as a discipline and its origins in questions of morality is further renewed. The volume editors focus on three areas: the current state of the sociology of morality across a range of sociological subfields; taking a new look at some of the issues discussed in the first handbook, which are now relevant in sometimes completely new contexts; and reflecting on where the sociology of morality should go next. This is a must-read reference for students and

scholars interested in topics of morality ethics altruism religion and spirituality from across the social science

The Active Society Revisited Wilson C. McWilliams, 2006 The Active Society published in 1968 is the most ambitious book in Amitai Etzioni's remarkable career In this new collection of essays Wilson Carey McWilliams brings together scholars in a range of disciplines to analyze the significance and shortcomings of this important work

Developing Public Service Leaders Mike Wallace, Michael Reed, Dermot O'Reilly, Michael Tomlinson, Jonathan Morris, Rosemary Deem, 2022-10-17 Developing Public Service Leaders examines why and how governments and representative bodies in public service organizations have mounted major interventions over the last two decades to develop senior staff as leaders A critical explanation is developed of the foundational contribution made by national leadership development interventions in the 2000s to the emergence proliferation and normalization of leadership development provision Through carrying out qualitative research in England the authors investigate the national leadership development interventions for school education healthcare and higher education Whilst also looking at the contemporary legacy of these interventions within a global scale examining the growing international movement and comparing interventions across the world The book looks at new ways to approach leadership development adopting a novel perspective on leadership as a metaphorical concept and coining the concept of leaderism and exploring how although senior staff may be widely acculturated as leaders they may not necessarily be committed to acting as government change agents Leadership development makes a diffuse contribution towards the ongoing neoliberalization of public services Developing Public Service Leaders is a comprehensive and essential read for a researcher or policymaker striving for an in depth understanding of the field and its ramifications

Evil in Modern Myth and Ritual Richard Stivers,2020-04-28 Richard Stivers concern is with the social construction of evil that is with how modern societies in a partly unconscious way create evil as a category of the sacred and how symbols myths and rituals of evil are related to this He is interested moreover in how modern societies provoke individuals to commit evil actions This fascinating and stimulating book is the first attempt to work out in detail how the concepts of the sacred symbol myth and ritual form a cultural configuration in modern technological societies and not just in traditional societies

Dominant Classes And The State In Development Sanjoy Banerjee,2019-03-04 Why does capitalist development give rise to political alliances between the state and certain economically dominant classes Addressing this question Professor Banerjee uses an evolutionary approach to social structure to develop a theory of the interaction within and among business and manufacturing firms a theory that highlights those aspects of market processes that promote the formation of dominant economic classes Structural evolutionary conceptions of property relations and of state planning and regulation are developed and combined with the market model According to Professor Banerjee the market property relations and state administration form a self sustaining structure that simultaneously develops the economy in an uneven and clustered fashion and gives rise to a dominant alliance between a segment of the state and the fastest accumulating classes in the economy He applies his model to India during the 1956 1975 period examining the industrialization process of the Second and Third plans the crisis of the mid 1960s and the Green Revolution

The Causal Power of Social Structures Dave Elder-Vass,2010-06-17 The problem of structure and agency has been the subject of intense debate in the social sciences for over 100 years This book offers a solution Using a critical realist version of the theory of emergence Dave Elder Vass argues that instead of ascribing causal significance to an abstract notion of social structure or a monolithic concept of

society we must recognise that it is specific groups of people that have social structural power Some of these groups are entities with emergent causal powers distinct from those of human individuals Yet these powers also depend on the contributions of human individuals and this book examines the mechanisms through which interactions between human individuals generate the causal powers of some types of social structures The Causal Power of Social Structures makes particularly important contributions to the theory of human agency and to our understanding of normative institutions
