Worldview Theory, Whiteness, and the Future of Evangelical Faith Jacob Alan Cook, 2021-09-28 The twenty first century has seen energy passing between religious and political worldviews kicking up dust around the identity and conviction based fault lines in American society While many evangelical Christians have developed and deployed a worldview theory to describe and locate themselves within the world's ideological strife Jacob Cook argues this approach has in effect compelled those listening to adopt the world's divisive modes of dealing with difference rather than living out a compelling alternative As a popular framework for theology in recent history world viewing has driven its white evangelical adherents to narrate human lives in this world including their own in ways that warp Christian identity as a personal social and theological reality Through close studies of key white evangelical leaders who utilized the worldview concept for political engagement and cultural transformation over the last century Cook reveals why worldview theory is inept for grasping real human complexity and moreover how it forms a barrier to genuine life together as creatures in a world only the living God can really view In between these studies he draws from current conversations in psychology sociology critical race studies and other fields to deliver a vigorous critique of the worldview concept and its use

Issues in Women's Land Rights in Cameroon Lotsmart N. Fonjong,2012 This book explores the customary social economic political and rights issues surrounding access ownership and control over land from a gender perspective It combines theory and practice from researchers lawyers and judges each with track records of working on women and rights concerns The nexus between the reluctance to recognize and materialize women's right to land and the increasing feminization of poverty is undeniable The problem assumes special acuity in an essentially agrarian context like Cameroon where the problem is not so much the law as its manner of application That this book delves into investigating the principal

sources and reasons for this prevalent injustice is particularly welcome As some of the analyses reveal denying women their right to land acquisition or inheritance is sometimes contrary to established judicial precedents and even in total dissonance with the country s constitution Traditional and cultural shibboleths associated with land acquisition and ownership that tend to stymie women s development and fulfilment must be quickly shirked for such retrograde excuses can no longer find comfort in the law morality nor in modern traditional thinking The trend albeit timid of appointing women to Land Consultative Boards and even as traditional authorities can only be salutary These are some positive practical steps that can translate the notion of equal rights into equal power over land for both sexes otherwise equality in this context will remain an unattractive slogan
