US Health: A Failed System: Liaropoulos, Lykourgos, 2016-10-29 Health has been one of the most frequent issues arising in the Social Policy debate for the last 60 or more years The answers given vary according to political ideology economic expediency and the moral standing of individuals and society The sources of funding are essentially two either the individual directly or a larger group acting on his behalf In the second case we have two main categories The individual is either covered by private for profit insurance or by a public insurance scheme financed by mandatory employment contributions and or by taxes on income and or wealth The economic implications of each form of health insurance are immense for individuals employers the government and for the economy as a whole The main differentiation is the position of health care in the value system of society If health care is considered a right its financing must be similar to that of other public goods or rights such as justice national security personal safety basic education etc At the same time the provision of all public goods is a public responsibility and government is judged by how well it measures up to this responsibility If on the other hand health care is considered a good bought and sold on the market then it is up to individuals to provide for themselves Obviously this fundamental issue belongs to the sphere of politics and is up to society to judge according to its code of ethics The time to decide has come in America somewhat belatedly but in a way more acute than ever The health of individuals but also and mainly the economic health of the nation depends on the decision *Public*

and academicians *Decentralization, Local Governance, and Social Wellbeing in India* Rani Mullen, 2017-05-18 Over the past three decades decentralization has been seen as the means for allowing local governments to become more accountable and for encouraging the deepening of democracy and the building of village communities By drawing on original village level case studies of six villages in three different Indian states this book presents a systematic analysis of the impact of decentralization on the delivery of social services at the local level within India Supplementing national and state level data and analyzing the different historical legacies in each state the book argues that decentralization is not simply a function of the structure of the decentralization program or of the relationship between higher tiered and local government Rather the possibility of decentralization affecting social outcomes depends on several interacting factors including the distribution of power among local elites the dynamics of political competition and the level of civil society mobilization By examining constitutionally mandated political decentralization across India this book identifies the circumstances under which local government structures can lead to improved social services and societal wellbeing as well as presenting a substantial contribution to studies on South Asian Politics and Local Government **Afropolis** Kerstin Pinther, Larissa Förster, Christian Hanussek, 2012 Metropolises often evoke images of flashy high rise buildings permanent background noise backed up cars and people moving quickly in all directions in their masses New York Tokyo London Sao Paulo But what about Cairo
