Garcia,2010 The history of international free trade union organisations during the first two decades of the Cold War is an important but often neglected aspect of the development of post war labour and liberalism In this path breaking book Rodriguez Garc a fills this void in the historical literature by offering a comparative analysis of two cases the European Regional Organisation ERO and the Inter American Regional Workers Organisation ORIT which were created in the early 1950s as regional branches of the International Confederation of Free Trade Unions ICFTU The author employs the term labour liberalism to describe their wide variety of functions She argues that social democratic and reformist trade unions which made up the bulk of ICFTU members were fundamentally shaped by liberal values even while calling for the active

participation of organised labour in the planning and implementation of projects promoting liberal democracy and socio economic development at home and abroad By placing international free trade unionism centre stage this book adds significantly to our understanding of post war labour and liberalism
