exploring the historical roots of each major subfield      **Society and Electoral Behaviour in Australia** David Alistair Kemp, 1978      **Political Parties and the Collapse of the Old Orders** John Kenneth White, Philip John Davies, 1999-01-07

With the passage of the Cold War political parties in nearly every corner of the globe have undergone a vast upheaval Old ideas have become obsolete electoral maps have been redrawn party structures have been rebuilt and new leaders have emerged Political Parties and the Collapse of the Old Orders describes these changes using several countries as laboratories the United States United Kingdom France Germany Italy Canada Australia Mexico Israel South Africa and Russia While the nature and extent of the political upheavals vary from place to place the transformations in each nation's party system have been extraordinary In this new world order the old political arrangements and old ways of doing things have disappeared The altered states of political parties in the post Cold War world pose a central question what does change look like The answers given here illuminate our understanding of why the world has changed and how political parties are attempting to cope with it

**New Developments in Australian Politics** Brian Galligan, Ian McAllister, John Ravenhill, 1997 An overview of contemporary issues in Australian politics Part I examines the operation of the political system and political culture Part II looks at issues such as republicanism and citizenship Part III examines Australia's recent attempts to reshape defence and foreign policy in response to the post Cold War international environment and Australia's response to the impact of globalisation on the economy Includes references and index Also available in paperback The 14 contributors include Clive Bean Graeme Cheeseman and Glyn Davis      *Social Inequality in Australian Society* John Stuart Western, 1983 Chapter 4 demonstrates that Aborigines have limited access to resources facilities and services in Australian society considers factors such as employment income education health access to health and welfare services housing experiences with legal system land rights participation in politics and public affairs

**Political Parties in Advanced Industrial Democracies** Paul Webb, 2002-09-26 How relevant and vital are political parties in contemporary democracies Do they fulfill the functions that any stable and effective democracy might expect of them or are they little more than moribund anachronisms relics of a past age of political life now superseded by other mechanisms of linkage between state and society These are the central questions which this book aims to address through a rigorous comparative analysis of political parties operating in the world's advanced industrial democracies Drawing on the expertise of an impressive team of internationally known specialists the book engages systematically with the evidence to show that while a degree of popular cynicism towards them is often chronic though rarely acute parties have adapted and survived as organizations remodelling themselves to the needs of an era in which patterns of linkage and communication with social groups have been transformed This has enabled them to remain central to democratic systems especially in respect of the political functions of governance recruitment and albeit more problematically interest aggregation On the other hand the challenges they face in respect of interest articulation communication and participation have pushed parties into more marginal roles within Western political systems The

implications of these findings for democracy depend on the observer's normative and theoretical perspectives. Those who understand democracy primarily in terms of popular choice and control in public affairs will probably see parties as continuing to play a central role while those who place greater store by the more demanding criteria of optimizing interests and instilling civic orientations among citizens are far more likely to be fundamentally critical.

***The Politics of the Second Electorate*** Joni Lovenduski, Jill Hills, 2018-12-19. Prior to publication there had been little study of the political role of women. Gender had been seen only as a background variable in social surveys of political behaviour and women had rarely been extensively or separately considered. Now in essays specially written for this volume, first published in 1981, the authors map out the political behaviour of women in twenty industrially developed countries, bringing together and analysing contemporary material on a variety of topics such as voting, standing for public office, entering the political elite and engaging in political activity outside the formal structures of government. In each chapter the history of women's political activity is outlined from the first movements for female suffrage and emancipation to the new political involvement occasioned by the women's movements of the 1970s. The impact of differing political systems on the experience of women is considered and some striking similarities and differences are pointed out. It has been generally agreed that women's participation in politics has been less than that of men, although reasons postulated for this have varied widely. The essays in this book offer further suggestions in this area while charting a steady increase in activity by women in all political spheres as feminism politicises issues previously restricted to private or male dominated spheres and women become increasingly concerned to participate in the political process. The authors indicate current trends and explode prevailing myths about the second electorate and they suggest future possibilities both for Political Women and the Political Science which must take account of feminist political activity. Students of social and political science, readers seeking comprehensive cross-national coverage of party and election data and all interested women will find the book to be a mine of information and a rare and readable picture of half the world's electorate.

**Explaining and Predicting Elections** Ian Budge, Dennis J. Farlie, 2025-08-01. First published in 1983.

Explaining and Predicting Elections is the first cross national and comprehensive explanation of election results It considers why one election differs from another and attempts to account for party gains and losses in the elections which have taken place in twenty three democracies in the post war period Budge and Farlie base their study on a radically new view of party behaviour Parties not arguing or debating over the same issues but talking past each other Their book shows why it is in the parties interest to do this how parties might improve their appeal and how electors react in a broadly rational manner by supporting one party alternative rather than another The discussion also considers important topics for example whether electors are abandoning old partisan loyalties and becoming more volatile The usefulness of these ideas is measured and checked against new evidence from twenty three countries These ideas are then used to produce advance predictions of ten elections in different countries which are then checked against actual results The reader can use the methods to make his own predictions for elections which interest him In many ways this makes Explaining and Predicting Elections the most comprehensive and useful investigation of the election process yet produced It will interest the general reader political practitioner historians and election and area specialists

**The End of Class Politics?** Geoffrey Evans,1999-09-23 The last few decades has seen a prolonged debate over the nature and importance of social class as a basis for ideology class voting and class politics The prevailing assumption is that in western societies class inequalities are no longer important in determining political behaviour In The End of Class Politics leading scholars from the US UK and Europe argue that the evidence on which the assumptions about the decline importance of class is based is unfounded Instead the book argues that the class basis of political competition has to some degree evolved but not declined Furthermore the social basis of political competition and sweeping claims about the new politics of postindustrial society need to be re examined

The Breakdown of Class Politics Terry Nichols Clark,Seymour Martin Lipset,2001-05-22 Class and its linkage to politics became a controversial and exciting topic again in the 1990s Terry Clark and Seymour Martin Lipset published Are Social Classes Dying in 1991 which sparked a lively debate and much new research The main critics of Clark and Lipset at Oxford and Berkeley held initially that class was more persistent than Clark and Lipset suggested The positions were sharply opposed and involved several conceptual and methodological concerns But the issues grew more nuanced as further reflections and evidence accumulated This book draws on four main conferences organized by the editors Sharply contrasting views are forcefully argued with rich and subtle evidence The volume includes a broad overview and synthesis major reports by leading participants and original theoretical and empirical contributions

**Youth and Political Participation** ,2007-01-01 Learning about politics and life as a citizen is part of the transition to adulthood During this stage young people in most Western democracies are introduced to political processes and issues as well as a range of political activities including voting and participation in social movements But young people make this transition differently The articles in this Book explore a range of ways that young people participate politically and also discuss those who are not active citizens The collection arose

from a meeting of Australian experts in Youth Studies who came together to discuss and debate issues related to youth political participation Collectively it provides a compendium of our current state of knowledge about this topic While specific attention is directed to young people s introduction to enrolment and voting discussions include broader questions such as what does it mean to be political and what role do various social institutions play in the political learning process Articles include discussions of the legal requirements in Australia regarding enrolment and voting whether there is such a thing as a youth vote and the social psychological dimensions of youth confidence in voting Topics related to the role of the family the school the media and the internet are included Other important issues such as gender differences youth disenchantment and disadvantaged youth receive much needed attention

**The Liberal Mind in a Conservative Party** Geoffrey

Robinson,2025-06-17 Robinson analyses the peculiarly Australian intellectual tradition of liberal conservatism within the mainstream centre right Liberal Party of Australia Conservative intellectuals in Australia have forged a pragmatic sceptical and utilitarian liberal conservatism focused on the tasks of government It remains distant both from the romantic and organicist ideas of the populist right and the simplicities of libertarianism Focusing on key figures within this tradition Robinson tracks the progress of Australian liberal conservatism over the years through its origins in the work of David Hume to the thoughts of Peter Coleman David Kemp and Andrew Norton before moving forward to George Brandis and Gregory Melleuish The Liberal Party of Australia has appealed successfully to the conservative sentiments of voters in a liberal society The Liberal Mind in a Conservative Party tells the story of seven intellectuals who helped make this possible Peter Coleman drew on John Anderson Georges Sorel and Michael Oakeshott to champion neoconservatism He argues that this potent political ideology has shaped a distinct political identity which rejects conservative traditionalism and libertarian economics while defending a pragmatic approach to capitalism A fascinating read for students and scholars of Australian politics this book will also be of great value to readers with an interest in international centre right politics
