The book also provides a foundation for the study of linguistic variation within a speech community as well as an introduction to methods of data collection when studying the outcomes of language use choices. An important aspect of this book is its emphasis on a participatory approach to language choice research that empowers the speech community. The final chapter discusses lifestyle concerns that researchers may encounter when conducting field studies in developing nations. He has conducted sociolinguistic surveys in more than 35 languages in Asia and the Americas and served as consultant on surveys in Africa, Australia, Europe, and the Pacific. Ken is particularly interested in the role of language research in strategic language development.

John Grummitt received his M A in Applied Linguistics from the University of Leicester in 2002, drawing on his decade's experience as an academic writing tutor and trainer of teachers in ESL programs in Japan and South Korea. His more recent survey work in Papua New Guinea has given him a perspective supplementary to Decker's on sociolinguistic fieldwork and language development.

Sociolinguistic and Typological Perspectives on Language Variation Silvia Ballarè, Guglielmo Inglese, 2023-10-04. Linguistic variation, loosely defined as the wholesale processes whereby patterns of language structures exhibit divergent distributions within and across languages, has traditionally been the object of research of at least two branches of linguistics: variationist sociolinguistics and linguistic typology. In spite of their similar research agendas, the two approaches have only rarely converged in the description and interpretation of variation. While a number of studies attempting to address at least aspects of this relationship have appeared in recent years, a principled discussion on how the two disciplines may interact has not yet been carried out in a programmatic way. This volume aims to fill this gap and offers a cross disciplinary venue for discussing the bridging between sociolinguistic and typological research from various angles with the ultimate goal of laying out the methodological and conceptual foundations of an integrated research agenda for the study of linguistic variation.
