Placencia, Rosina Márquez Reiter, 2005-06-28 The first substantial textbook on pragmatics to focus on Spanish The authors discuss key theories within the Anglo American tradition of pragmatics concentrating on the relationship between language use and socio cultural contexts and their uptake by Hispanists Drawing on research by foremost scholars in the field with reference to a wide range of Spanishes including a first treatment of sociopragmatic variation Concepts throughout are illustrated with real language examples taken from different Spanish corpora The book is carefully structured to be appropriate for upper level undergraduate as well as postgraduate students

Sociolinguistics Ulrich Ammon, 2005 *Doubling and Duplicating in the Book of Genesis* Elizabeth R. Hayes, Karolien Vermeulen, 2016-09-01 The style of the Hebrew Bible has long been of significant interest to scholars and exegetes alike Early Jewish and later Christian commentaries point out the importance of the exact wording in interpreting the text and many an article has been written on features such as repetition and inclusio With the rise of literary and narrative criticism in biblical studies these features have received even more attention The current book stands in the tradition of Robert Alter in that it focuses on how the text of Genesis is written and phrased More explicitly it is interested in why Genesis is formulated the way it is and how this affects the reader in his her encounter with the text Doubling and Duplicating is not only concerned with a style as analysis frame for interpreters but also with its role as a guide for any audience and its gateway to the ancient mind set ideological ontological and so on All of the contributors to this collected volume focus on the form of the book of Genesis that is on its use of language and formulation Yet each author does this in his her own way depending on the most fitting tool for the specific research question or based on the researcher s methodological background Thus the essays

represent the various approaches in current literary and stylistic criticism as applied to the biblical corpus Furthermore the recurring duality of the features discussed in each of the contributions adds to the overall unity of the volume This recurrence suggests the presence of a stylistic feature in the book of Genesis the feature of doubling and duplicating that surpasses the other features of the individual units or stories This book offers insights about meaning making on both the micro and the macro text levels Discourse, the Body, and Identity J. Coupland,R. Gwyn,2002-12-17 The body and discourse seem diametrically opposed but we interact with our bodies and represent ourselves and our relationships in bodily terms This volume integrates new studies by leading researchers in sociolinguistics sociology social psychology and cultural theory It explores the many interfaces of body and discourse organized under three main themes the body as an interactional resource ideological representations of the body and discursive constructions of the body in normal and pathological contexts

The Social Construction of Age Patricia Andrew,2012-01-11 This book explores the social construction of age in the context of EFL in Mexico It is the first book to address the age factor in SLA from a social perspective Based on research carried out at a public university in Mexico it investigates how adults of different ages experience learning a new language and how they enact their age identities as language learners By approaching the topic from a social constructionist perspective and in light of recent work in sociolinguistics and cultural studies it broadens the current second language acquisition focus on age as a fixed biological or chronological variable to encompass its social dimensions What emerges is a more complex and nuanced understanding of age as it intersects with language learning in a way that links it fundamentally to other social phenomena such as gender ethnicity and social class Language in Use Patrick Griffiths,Andrew John Merrison,Aileen Bloomer,2020-07-24 Designed for introductory students this collection of key readings in language and linguistics will take readers beyond their introductory textbook and introduce them to the thoughts and writings of many esteemed authorities The reader includes seminal papers new or controversial pieces to stimulate discussion and reports on applied work Language in Use is split into four parts Language and Interaction Language Systems Language and Society and Language and Mind covers all the topics of language study including conversation analysis pragmatics power and politeness semantics grammar phonetics multilingualism child language acquisition and psycholinguistics has readings from authorities including Pinker Fairclough Crystal Le Page and Tabouret Keller Hughes Trudgill and Watt Halliday Sacks Mills Obler and Gjerlow provides comprehensive editorial support for each reading with introductions activities or discussion points to follow and further reading Is supported by a companion website offering extra resources for students including additional activities useful weblinks and advice from the authors Designed for use as a companion to *Introducing Language in Use* Routledge 2005 but also highly usable as a stand alone text this Reader will introduce readers to the wide world of linguistics and applied linguistics Dialectological and Folk Dialectological Concepts of Space Sandra Hansen,Christian Schwarz,Philipp Stoeckle,Tobias Streck,2012-10-30 In variational linguistics the concept of space has always been a central issue However

different research traditions considering space coexisted for a long time separately Traditional dialectology focused primarily on the diatopic dimension of linguistic variation whereas in sociolinguistic studies diastatic and diaphasic dimensions were considered For a long time only very few linguistic investigations tried to combine both research traditions in a two dimensional design a desideratum which is meant to be compensated by the contributions of this volume The articles present findings from empirical studies which take on these different concepts and examine how they relate to one another Besides dialectological and sociolinguistic concepts also a lay perspective of linguistic space is considered a paradigm that is often referred to as folk dialectology Many of the studies in this volume make use of new computational possibilities of processing and cartographically representing large corpora of linguistic data The empirical studies incorporate findings from different linguistic communities in Europe and pursue the objective to shed light on the inter relationship between the different concepts of space and their relevance to variational linguistics
