**Abstract.** This paper delves into various aspects of ethical issues surrounding digital communication technologies in the new media environment, including personal privacy breaches, the spread of false information, and intellectual property infringement. It proposes targeted solutions, such as improving laws and regulations, enhancing ethical education, and establishing robust oversight mechanisms to tackle these challenges. Furthermore, through case analysis, it reveals the potential threats that ethical issues pose to social order and public interest, emphasizing the importance of a healthy development of digital communication technologies in the new media context.

**Keywords:** New Media Environment; Digital Communication Technology; Ethical Issues.

## 1. Overview of Digital Communication Technology Development in the New Media Environment

New media, as a concept relative to traditional media, encompasses all forms of digital media. It features notable characteristics such as interactivity, immediacy, personalization, diversity, and accessibility. Interactivity allows users to participate in the creation, sharing, and dissemination of content, breaking the one-way communication pattern of traditional media and enabling real-time interaction between senders and receivers. Immediacy reflects the rapid pace of information dissemination in new media, allowing users to access the latest news promptly. Personalized content recommendations and services cater to diverse user needs, while diversity manifests in various formats, including text, images, audio, and video. Furthermore, with the widespread adoption of the internet and mobile devices, the user base of new media continues to grow, encompassing individuals of varying ages, professions, and regions.

The development of digital communication technology can be traced back to the postal era, when information dissemination relied mainly on letters and telegrams, which were relatively slow and limited in scope. The advent of the broadcasting era, marked by the emergence of radio and television, significantly enhanced the speed and reach of information transmission. The arrival of the internet era has further accelerated the rapid development of digital communication technologies, giving rise to emerging communication methods such as email, forums, and blogs. Today, we find ourselves in the mobile internet era, where the proliferation of smartphones and mobile internet has made digital communication technology more convenient, with social media and instant messaging tools becoming mainstream.

Under the new media environment, the application of digital communication technology reflects multiple aspects. First, social media platforms like WeChat, Weibo, and Douyin have become vital channels for people to obtain information and engage in interaction. Second, various news apps, video streaming sites, and knowledge-sharing platforms offer rich and diverse content services, catering to different user needs. The rise of online education has positioned digital communication technology as crucial in the education sector, allowing users to learn various knowledge and skills anytime and anywhere. Additionally, businesses utilize digital communication technology for online marketing, achieving brand promotion, product sales, and customer service. Government agencies also provide online public services using digital communication technology, enhancing administrative efficiency
