Social Measurement Current Issues:

Notes on Social Measurement Otis Dudley Duncan, 1984-08-31 A richly erudite history of measurement and an account of its current state in the social sciences fascinating informative provocative James S Coleman University of Chicago Wise and powerful American Journal of Sociology Personal and provocative an excellent set of historical and critical ruminations from one of social measurement's greatest contributors Choice **Measurement, Design, and Analysis** Elazar J.

Pedhazur, Liora Pedhazur Schmelkin, 2013-04-15 In textbooks and courses in statistics substantive and measurement issues are rarely if at all considered Similarly textbooks and courses in measurement virtually ignore design and analytic questions and research design textbooks and courses pay little attention to analytic and measurement issues This fragmentary approach fosters a lack of appreciation of the interrelations and interdependencies among the various aspects of the research endeavor Pedhazur and Schmelkin's goal is to help readers become proficient in these aspects of research and their interrelationships and to use that information in a more integrated manner The authors offer extensive commentaries on inputs and outputs of computer programs in the context of the topics presented Both the organization of the book and the style of presentation allow for much flexibility in choice sequence and degree of sophistication with which topics are dealt

Findley, Calvin Goldscheider, 2019-10-16 Perhaps because I grew up on a farm in Ohio I have long been interested in rural development Although I first became a migrant at the age of 17 when I left the farm to continue my studies in a city college I

was not aware of the relation between rural development and migration until many years later when I began studying patterns of urban and rural poverty This research has grown out of my continuing investigation of the ways that migration has been seen as both a response to chronic conditions of rural poverty and a factor potentially exacerbating urban poverty conditions If governments wanted to deal with urban poverty they would want to restrict urban in migration yet if they reduced urban in migration this would remove one of the important means available to persons seeking to raise themselves out of rural impoverishment This would clearly be a no win situation for the rural poor the only way to deal fairly with both urban and rural poverty would be to foster socio economic development of rural areas Thus I became interested in studying the patterns of rural development which actually have had an effect on the migration decisions of rural families *Flashbulb Memories* Olivier Luminet,Antonietta Curci,2017-08-07 Are Flashbulb memories special or ordinary memory formations Are emotional cognitive or social factors highly relevant for the formation of Flashbulb memories How can sociological historical and cultural issues help us to understand the process What is the difference between Flashbulb memories memories of traumatic experiences and highly vivid personal memories How can we provide a valid and reliable measure for Flashbulb memories This edition of *Flashbulb Memories New Challenges and Future Perspectives* revisits these questions considering significant new evidence and research in the field It now includes additional chapters focusing on experimental investigations and review studies on positive vs negative Flashbulb memories Bringing together leading international researchers the book presents significant progress in this area of research which has remained divisive for the past 40 years The discussion of Flashbulb memories also contributes to the understanding of the general functioning of autobiographical memory It will provide essential reading for researchers in Flashbulb memories and will be of great interest to those in related areas such as cognitive psychology social psychology cross cultural psychology sociology political sciences and history as well as clinicians dealing with those who have strong Flashbulb memories after personal traumatic events **Advances in Human Factors and Ergonomics 2012- 14 Volume Set** Gavriel Salvendy,Waldemar Karwowski,2012-08-06 With contributions from an international group of authors with diverse backgrounds this set comprises all fourteen volumes of the proceedings of the 4th AHFE Conference 21 25 July 2012 The set presents the latest research on current issues in Human Factors and Ergonomics It draws from an international panel that examines cross cultural differences design issues usability road and rail transportation aviation modeling and simulation and healthcare **Advances in Affective and Pleasurable Design** Yong Gu Ji,2012-07-17 This volume discusses pleasurable design a part of the traditional usability design and evaluation methodologies The book emphasizes the importance of designing products and services to maximize user satisfaction By combining this with traditional usability methods it increases the appeal of products and use of services *Risk and Resilience* John G. Borkowski,Jaelyn R. Farris,Thomas L. Whitman,Shannon S. Carothers,Keri Weed,2007-03-20 In 1984 a longitudinal study was launched at the University of Notre Dame to evaluate the social and psychological consequences of

teenage parenting *Interwoven Lives Adolescent Mothers and Their Children* 2001 described in detail the development of these adolescent mothers and their children across the first eight years of life Major delays were first noticed in children's patterns of attachment at age 1 and their IQ and personal adjustment scores at age 3 By age 8 school related problems were found in 70% of the children With these data as the backdrop this companion volume *Risk and Resilience* identifies major risk factors associated with long term developmental delays as well as the processes that led to resilience in some of the mothers and children This new volume traces the children's development at ages 8 10 and 14 The editors focus on identifying risk and protective factors associated with important life course trajectories as the mothers entered early adulthood and their children became adolescents Relatively unexplored protective factors such as religiosity patterns of father involvement and romantic relationships were found to positively influence development for both teenage mothers and their children This new text also addresses New methodological approaches with an emphasis on the use of hierarchical linear and structural equation modeling and dynamical systems analyses Implications for prevention and intervention programs Intellectual educational and socioemotional outcome data The dark side of rearing children in poverty The multiple risks related to adolescent parenting and their profound impact on children's development How resilience emerges in children's lives and the specific factors that promote it *Risk and Resilience* appeals to researchers in developmental psychology and family processes as well as agency and government professionals charged with public policy and service delivery

Assimakopoulos, 2017-11-09 This book analyses the relationships among product safety strategy and culture concurrent engineering new product development NPD processes and product safety performance Product safety is a matter of enormous economic and societal concern given the safety risks to consumers and the financial risks to producers Nevertheless a thorough conceptual understanding of the effects of NPD policies and practices is still largely missing as several large scale trends have made clarifying the role of product safety in its socio economic context difficult including the rise of consumerism and the shift in the balance of power from manufacturers to customers and regulators the internationalization of value chains and the fragmentation of markets worldwide and technological change leading to a sophistication of products that rendered average consumers increasingly unaware of risk and potential accidents This volume sets out to close the gaps among research practice and policy with an emphasis on advocating responsible product innovation Through an in depth study of the durable juvenile products industry the authors discover important relationships for example that top management involvement safety first culture and robust NPD processes are paramount in increasing product safety and decreasing product recalls in firms On the other end of the spectrum concurrent engineering does not automatically lead to product safety they found no magic bullet through which product safety can be tied to the use of a particular tool skill or practice Offering a dynamic framework for aligning the interests of multiple stakeholders including manufacturers regulators and consumers the authors provide a clearer understanding of product safety and its implications for scholars students policy makers and practitioners in the areas of innovation management product management R D management and responsible research and innovation *Advanced Methodologies and Technologies in Business Operations and Management* Khosrow-Pour, D.B.A., Mehdi, 2018-09-14 Businesses consistently work on new projects products and workflows to remain competitive and successful in the modern business environment To remain zealous businesses must employ the most effective methods and tools in human resources project management and overall business plan execution as competitors work to succeed as well Advanced Methodologies and Technologies in Business Operations and Management provides emerging research on business tools such as employee
