The Persistence of Critical Theory Gabriel R. Ricci, 2017-07-05 The latest volume of Culture and Civilization gathers contemporary exponents of critical theory specifically those based in the Frankfurt School of social thinking Collectively this volume demonstrates the continuing intellectual viability of critical theory which challenges the limits of positivism and materialism We may question how the theoretical framework of Marxism fails to coordinate with the conditions that defined labor forces as did Max Horkheimer and Theodor Adorno or deliberate on the conditions that justify the claims we make through public discourse as did Jurgen Habermas Or like Axel Honneth we may reflect on recognition theory as a means of addressing social problems Whatever our objective the focus of critical theory continues to be the consciousness of established positive interests that without debate may sustain injustices or conditions which the public may not have chosen to impose Throughout the hardship of punitive dismissal and exile in the 1930s and 40s and the shock of the New Left in the 1960s and 70s and finally the later linguistic and pragmatic turn the Frankfurt School has sustained the idea that people escape disaffection and alienation when their knowledge of the social and political world is dialectically mediated through creative interaction This new volume in the Culture and Civilization series continues the tradition of critical thought

positions are clearly delineated the authors consider both the positive and negative consequences of media bias and how the bias plays out within a media conscious democratic society
