How Industry Analysts Shape the Digital Future Neil Pollock, Robin Williams, 2016-01-14 Industry analysts are in the business of shaping the technological and economic future They attempt to predict what will become the next big thing to spot new emerging trends and paradigms to decide which hi tech products will win out over others and to figure out which technology vendors can deliver on their promises In just a few short years they have developed a surprising degree of authority over technological innovation Yet we know very little if anything about them This book seeks to explain how this was achieved and on what this authority rests Who are the experts who increasingly

command the attention of vendor and user communities What is the nature of this new form of technical and business knowledge How Industry Analysts Shape the Digital Future offers the first book length study into this rarely scrutinized form of business expertise Contributions to this volume show how from a small group of mainly North American players which arose in the 1970s Gartner Inc has emerged as clear leader of a 6 billion industry that involves several hundred firms worldwide Through interviews and observation of Gartner Inc and other industry analyst firms the book explores how these firms create their predictions market classifications and rankings as well as with how these outputs are assessed and consumed The book asks why many social scientists have ignored the proliferation of these new forms of management and technical expertise In some cases scholars have deflated this kind of business acumen portraying it as arbitrary knowledge whose methods and content do not deserve enquiry The valuable exception here has been the path breaking work on the performativity of economic financial or accounting knowledge Drawing upon recent performativity arguments the book argues the case for a Sociology of Business Knowledge

Robert K. Merton and Contemporary Sociology

Carlo Mongardini, 2018-04-17 This volume offers scholars of sociology and allied areas the fruits of an international conference on the contributions of the eminent Robert K Merton The assessment as good in content as well as in participants took place in Amalfi Italy with the participation of Merton himself and under the auspices of the Italian Sociology Association Carlo Mongardini aptly summarizes the unique impact of Merton on the social theory of our century His strength as a classic writer lies in his balance unveiling complexity and in his humanism which looks beyond the apparent simplicity and coherence of social reality A special treat is the final chapter by Merton reviewing Unanticipated Consequences and Kindred Sociological Ideas In it he ranges from the historical antecedents of the concept to his own evolution in the use and expansion of the idea Merton approaches the development of his thought as installments rather than simple evolution and in so doing gives us unique insight into how he built upon his originating notions in the context of social science as it existed in the United States Tensions between integrating scholarship and reaching the general public provide a special insight into Merton that might

prove new even to those who know his work well Contributors to this original volume include Volker Meja Nico Stehr Paolo Ammassari Gianni Statera Birgitta Nedelmann Harriet Zuckerman Piotr Sztompka Peter Gerlich Charles Crothers Elena Besozzi and Arnold Zongerle among others The chapters address the full range of Merlon s work with special emphasis on such areas as anomie structural analysis the relationship of theory to research patterns of latent and manifest influence and even the application of Mertonian concepts to the analysis of Merton as a scholar This unusual compendium translated from the Italian will interest social researchers across the academic spectrum

Society in Action Piotr Sztompka,1991-08-27

In *Society in Action* Piotr Sztompka sets forth a highly topical contribution to central theoretical debates of contemporary sociology Taking the idea and practice of collective mobilization as his theme Sztompka argues that modern institutions particularly of late are characterized by an increasing awareness of collective empowerment The most obvious concrete expression of this phenomenon as Sztompka makes clear is the rise of a diversity of active social movements such as those which dramatically transformed Europe in the 1980s from the birth of Solidarity in 1980 to the 1989 Autumn of Nations Sztompka connects the interpretations of such collective activity to a wider grasp of the nature of social action The result is a comprehensive and original theory of social change which focuses on the self transforming influence on society of its members striving for freedom autonomy and self fulfillment He develops his theory by means of a general concept of social becoming the roots of which he traces to the early romantic and humanist work of Karl Marx and his followers and to two influential sociological schools of today the theory of agency and historical sociology Sztompka situates his theory midway between the rigid determinism of social totalities and the unbridled voluntarism of free individuals Social change he demonstrates can be understood neither as the outcome of individual actions taken alone nor as structurally determined actions Instead he confers upon social organizations and movements a self transcending quality they express human agency yet by virtue of their active character are quite often able to achieve unpredictable outcomes Throughout his analysis of social movements and revolutions in history Sztompka emphasizes the dynamics of spontaneous social change generated from below a theoretical testimony to the rapid and fundamental social change in Eastern Europe in recent history Against the fashions of postmodernist malaise boredom and disenchantment his theory of social becoming expresses the possibility of emancipation of change leading to positive gains His work registers a belief in progress not inevitably gained but its attainment fully dependent upon the creativity and optimism of an active citizenry
