Social Role Of Higher Education:

The Social Role of Higher Education, 2001 **The Social Role of Higher Education** Ken Kempner, William G Tierney, 2018-10-10 Originally published in 1996 The Social Role of Higher Education is an anthology of nine papers it presents cases studies showing how culture influences the social role of higher education in various nations It examines how environments get defined and how they shape universities and how knowledge and academic work interact in national contexts This book focuses on how both developed and developing countries systems of higher education are affected by their own culture and their place within the larger global context Rethinking Universities Sally Baker, Brian J. Brown, 2007-09-14 Most people who work and study in universities will be aware that they are changing Yet few have so far grasped the extent of this change or have attempted to put it in a coherent intellectual framework This volume provides new ways to understand how the university workforce in developed nations is being encouraged to change itself and how the social role of these institutions has shifted from places of higher learning toward being agents for social change and the promotion of human welfare Moreover the demands that are being placed on institutions and the kinds of graduates they are required to produce has changed too with the emphasis on a new brand of vocationalism and a reinvigorated focus on skills and employability This volume provides a theoretically informed philosophically sophisticated account of what universities in developed nations are being encouraged to do and the impact this has on their staff students and the societies of which they are a part **Higher Education in a Globalising World** J. Enders, Oliver Fulton, 2012-12-06 This Festschrift is dedicated to Ulrich Teichler who is celebrating his sixtieth birth day in 2002 Ulrich Teichler has been a central actor in the development of the field of research on higher education in Germany Europe and beyond Not only has he dedicated his professional career to studying a large number of higher education topics through national and international research projects He was also in the fore front of the efforts to strengthen the structure and profile of higher education re search for example through his involvement in the establishment of the Consortium of Higher Education Researchers CHER In addition he has contributed to many important scholarly works reflecting on the state of the art and the nature of the field The conventional wisdom is that working in a university or college makes you an expert on higher education Consequently while academics like to do research on every possible topic they are in general reluctant to examine their own social institution Within the European context Ulrich Teichler is one of the main exceptions to this rule Already in his student days he has recognised the unique characteristics of higher education institutions and systems and he understood that special efforts are needed to improve our knowledge on higher education Universities with a Social Purpose Kerry Shephard, V. Santhakumar, 2024-01-05 This book is a narrative of conversations between two professors with different backgrounds academic disciplines life experiences and from different continents It shows how their discourse has brought them to a single destination defined by a mutual interest in the social purposes of universities and a hope in common that their academic

efforts will somehow do good in the world The seventeen internationally agreed Sustainable Development Goals SDGs provide focus for aspirations and plans regarding sustainability but notably the SDGs targets and indicators rarely provide detailed accounts of who is expected to enact change This book addresses the role of higher education in this context and explores the social purposes of universities and their relation to the Sustainable Development Goals It presents an academic analysis of this complex situation based on insights from published literature on higher education and the personal but very different experiences of two professors with this shared interest **Higher Education in the New Century**, 2007-01-01

Higher education worldwide faces similar challenges how to cope with globalization the provision of access to underserved populations and others Higher Education in the New Century has identified six key challenges and has focused careful analysis on them The topics are The academic profession Access and equity Higher education and social cohesion Private higher education International student circulation The research university Each of these themes is analyzed by a group of international scholars in order to provide a multidisciplinary and cross national perspective This book stems from the Fulbright New Century Scholars Program an international research project involving more than 20 countries Because of its broad perspective this book brings a fresh analysis to central issues For example the analysis of how universities can contribute to social cohesion in divided societies is unique International student flows are discussed from a south south perspective The Social Role of the University Student Florian Znaniecki, 1994 This previously unpublished demographic study explores the activities behaviors goals and other facets of students attending the University of Illinois at Urbana Champaign during the early 1940s

European Higher Education Area: The Impact of Past and Future Policies Adrian Curaj, Ligia Deca, Remus Pricopie, 2018-07-03 This volume presents the major outcomes of the third edition of the Future of Higher Education Bologna Process Researchers Conference FOHE BPRC 3 which was held on 27-29 November 2017 It acknowledges the importance of a continued dialogue between researchers and decision makers and benefits from the experience already acquired this way enabling the higher education community to bring its input into the 2018-2020 European Higher Education Area EHEA priorities The Future of Higher Education Bologna Process Researchers Conference FOHE BPRC has already established itself as a landmark in the European higher education environment The two previous editions 17-19 October 2011 24-26 November 2014 with approximately 200 European and international participants each covering more than 50 countries each were organized prior to the Ministerial Conferences thus encouraging a consistent dialogue between researchers and policy makers The main conclusions of the FOHE Conferences were presented at the EHEA Ministerial Conferences 2012 and 2015 in order to make the voice of researchers better heard by European policy and decision makers This volume is dedicated to continuing the collection of evidence and research based policymaking and further narrowing the gap between policy and research within the EHEA and broader global contexts It aims to identify the research areas that require more attention prior to the anniversary 2020 EHEA Ministerial Conference with an emphasis on

the new issues on rise in the academic and educational community This book gives a platform for discussion on key issues between researchers various direct higher education actors decision makers and the wider public This book is published under an open access CC BY license

The New Power University Jonathan Grant,2021-04-28 In a changing world what is the social purpose of higher education Combining a critique of contemporary universities a manifesto for the future and a provocation to stimulate change The New Power University examines how higher education can flourish in the 21st century Using the framing of new power Jonathan Grant illustrates how a different purpose for universities is necessary through the application of a new set of values that puts social responsibility at the core of the academic mission allowing the university to become an advocate of the policy and political issues that matter to its communities The New Power University offers both a warning against the complacency of old power and a voice for many who see the opportunity and necessity for radical change in higher education Jonathan Grant examines the trends and urges the shedding of old shibboleths in order to embrace a new future Insightful and engaging this book will spur and shape the urgent debates learning communities need to have and resolve to avoid being left behind Julia Gillard Former Australian Prime Minister and Minister for Education Chair elect of the Wellcome Trust A must read for anyone interested in the transformative power of higher education Ed Byrne Former President King s College London co author of The University Challenge The New Power University is essential material for anyone wondering what universities are for and how they can help provide the answers to the most pressing challenges of our times Jo Johnson Chairman of Tes Global former UK Minister for Universities Science and Innovation

Social Innovation in Higher Education Carmen Păunescu,Katri-Liis Lepik,Nicholas Spencer,2022-01-01 This open access book offers unique and novel views on the social innovation landscape tools practices pedagogies and research in the context of higher education International multi disciplinary academics and industry leaders present new developments research evidence and practice expertise on social innovation in higher education institutions HEIs across academic and professional disciplines The book includes a selected set of peer reviewed chapters presenting different perspectives against which relevant actors can identify and analyse social innovation in HEIs The volume demonstrates how HEIs can respond to societal challenges support positive social change and contribute to the development of international public policy discourse It answers the question how does the present higher education system in different countries promote social innovation and create social change and impact In answering this question the book identifies factors driving success as well as obstacles Furthermore it examines how higher education innovation assists societal challenges and investigates the benefits of effective social innovation engagement by HEIs The interdisciplinary approach of the volume makes it a must read for scholars students policy makers and practitioners of economics education business and management political science and sociology interested in a better understanding of social innovation

Citizenship, Nation-building and Identity in the EU Cherry James,2018-12-17 With Brexit looming a major issue facing UK Higher Education is whether the UK will be able to

stay in the Erasmus Programme This book sits at the intersection of three main interrelated themes EU citizenship the current state of the university in Europe and student mobility as they play out in the context of an EU funded programme established not least to promote European identity European consciousness and European citizenship Exploring through interviews with students from many countries this book weaves together the themes of citizenship creation as a device for building a nation and a polity the university as a public space in the era of the marketization of higher education and communicative interaction as the mechanism by which citizenship is created Ultimately it asks if the building bricks of national citizenship can be transposed to the transnational scale and assist in creating the transnational EU citizenship It finds surprisingly that far from encouraging and facilitating the communicative interaction on which the development of EU citizenship was postulated central features of the Erasmus Programme inadvertently work against this outcome This book will be of key interest to scholars and students of EU law and European and EU studies Citizenship Studies sociology and more broadly to higher education in general
