the basis of social policies compatible with their socio political and economic systems This resulted in the coming into existence of a large number of services rendered by the State to its citizens touching all aspects of their lives cutting through informal intermediary institutions and developing a direct link with it The focus of this study is on these services in two such states i e the Netherlands and the United Kingdom Their provision and administration for ethnic minorities that form part of their national communities is dealt with in particular The Netherlands and the United Kingdom have constitutional monarchical systems based on the sovereignty of the people Liberalism is an underlying sociological base for their societies Both had acquired overseas colonies which resulted in the settlement of people with ethnic origins different from their dominant group within their national communities These factors make the two comparable However the ideological basis social and economic forces and movements that led to the establishment of State welfare in the two states differ significantly The study reveals that their particular ideological positions on State Society relations have a significant impact on social policies adopted by them and in the modalities of their implementation The British stand on assimilation in one dominant culture and the Dutch stand on integration with acceptance of pluralism throw up the genuine problems in the harmonization of social policy in a United Europe of the future      The German and Dutch Economies Lei Delsen,Eelke de Jong,2012-12-06 Institutions have both positive and negative effects on economic performance The theoretical and empirical understanding of the roles played by institutions norms and culture in the functioning of markets still is limited This book contributes to a better understanding of the role played by institutions in economic life and to more balanced and better founded policy decisions related to the re structuring of industrial economies in response to the structural changes internationalisation of the economies the advances in information and communication technology and the ageing of populations they all are confronted with      **The Persistent Religious Gender Gap in the Netherlands in Times of Secularization, 1966-2015** Joris Kregting,2020-02-19 Over the last 50 years the Netherlands has undergone a process of massive secularisation in terms of the decline of institutionalised religion This study tests a wide range of explanations for this process built on modernisation theory with high quality survey data In addition despite modernisation and the rise of gender equality in the area of social structural location a religious gender gap persists in the Netherlands with women being more religious than men With a comprehensive model of social and psychological differences between Dutch men and women this study contributes to an explanation for this gap      **European Social Charter** Council of Europe.
