A Social Critique of Corporate Reporting David Crowther, 2016-03-16 In the critically acclaimed first edition of *A Social Critique of Corporate Reporting* David Crowther examined the perceived dialectic around traditional and environmental reporting to show it to be a false dialectic Corporate reporting continues to change rapidly to incorporate more detail and especially environmental and social information At the same time the mechanism for reporting has changed and the internet now enables more information to be provided to an ever wider range of stakeholders and interest groups The perceived conflict between financial performance representing the needs of investors and other dimensions of performance representing the needs of other stakeholders still however continues to exist In this updated edition this perceived conflict is re examined along with the wider purposes of corporate reporting These are examined in the context of web based reporting and a greater concern for all stakeholders The conclusion is that although recent developments have produced changes the essential conflict is still professed to exist but remains a largely imaginary one The analysis in this book makes use of both statistics and semiotics and in so doing develops a semiology of corporate reporting that offers an alternative to other research that is largely based on econometrics Researchers higher level students and others with an interest in or responsibility for corporate reporting corporate social responsibility accounting research or semiotics will find this book essential reading

Understanding Management Control and Organisational Sense-making Dr Krister Bredmar, 2016-07-29 Summary This book centres around three different areas management control organisations and information systems in order to understand what is actually going on and to make sense of management control questions Management control techniques used today could in many cases be traced back to industrialisation With the help of computeraised information systems the speed and detail with which a manager could get a hold of important information has increased Today it has become even more important to be able to choose what information to work with and that the context in which it should be used is understood Organisational sense making is in many ways an interesting and important path to take in order to do this When working with the management control function it is important to understand the organisation where the work is undertaken One important part of the function is planning and another is control Both are needed in order for the management control function to work Performance is often a key ingredient when trying to find out what is working in a plan and what is not and here the understanding for information becomes necessary Since the work is done within an organisation both by managers and employees it is also crucial to find ways to work with not only models methods and techniques but also people and social dimensions Key Features Managers and employees want to act in a meaningful way in general The way planning and control is undertaken in an organization is to a large extent dependent on the way a manager

interprets information about the organisation Decisions and actions can be traced to the interpretation of a situation in the past and present Since organisations are built on people it is important to try to understand why they act in a certain way and how their understanding of the organisation is evolving Management control has in many ways been described as a function that is dependent on different techniques and methods however it can also be described as a social process focusing on decisions and actions Information systems have come to play a crucial role in managing an organisation especially when it comes to tracing performance The demand for responsible and accountable management has led to an increased emphasis on meaningful decisions and actions The Author Dr Krister Bredmar is associate professor at Linneaus University in Sweden He has for more than 20 years worked with management control and organisational sense making both in theory and in practice His research has been published both in academic journals and in books Readership Scholars students and practitioners Contents The accounting heritage Corporate epistemology Thinking ahead The essence of management control Understanding performance The control concept in management control Reports communication and stakeholders The essence of sense making Organisations as a set of social relations Information systems and management control Individuals and organisations Organisational structure A social perspective A decisions context Techniques and functions Thinking and acting strategically Accounting tools Information and knowledge The performance paradox

A Social Critique of Corporate Reporting: A Semiotic Analysis of Corporate Financial and Environmental Reporting David Crowther, 2018-02-06 This title was first published in 2002 This text is concerned with the role of corporate reporting in UK public limited companies It is a common assumption that the most significant part of any corporate report is the accounting information contained within This book however takes a different view The central argument is that the purpose of corporate reporting has changed from one primarily of stewardship and accountability to shareholders to a more outward and forward looking perspective The author argues that one of the driving forces for this change in orientation is the discourse of environmental accounting along with other forces The book is essentially explorative The author is concerned with looking at different aspects of the changes in corporate reporting and taking different perspectives in the development of the argument

Accounting for Management Control David Otley and Kenneth Merchant Clive Emmanuel, 2013-11-21 Covers all aspects of accounting management for both programmed and non programmed activities At the end of each chapter there is a set of exercises to facilitate understanding of the topics discussed and case studies have been included in the final chapter

Management Control Theory A.J. Berry, J. Broadbent, D.T. Otley, 2019-05-23 First published in 1998 this volume of readings provides an overview of the development of the study of Management Control theory over the past 35 years The period encompasses the publication of a major and seminal text by Anthony and Dearden in 1965 which acted as a

touchstone in defining the range and scope of management control systems This laid management control s foundations in accounting based mechanisms of control an element which has been seen as both a strength and a constraint A good deal of work has followed providing both a development of the tradition as well as a critique In this volume we attempt to provide a range of readings which will illustrate the variety of possibilities that are available to researchers scholars and practitioners in the area The readings illustrate the view that sees control as goal directed and integrative They go on to explore the idea of control as adaption consider its relationship with social structure and survey the effects of the interplay between the organisation and the environment The essays included are not intended to lead the reader through a well ordered argument which concludes with a well reasoned view of how management control should be Instead it seeks to illustrate the many questions which have been posed but not answered and to open up agendas for future research **Innovation,**
