Maccarini, 2019-03-01 This book addresses the problem of the transition to new forms of social order in the global world As a haunting sense of historical discontinuity pervades Western societies it offers a fresh perspective on the issue focusing on two basic coordinates to pinpoint the developmental path of rapidly changing societies one is the mechanism of unfettered social morphogenesis and the other is the specific kind of societal unification brought about by globalization with the related closure of the world The book draws on the theoretical work produced in the five volumes of the Springer series Social Morphogenesis and applies it in a sustained and concerted approach to the empirical examination of macro social change The first part of the book presents the social ontology of the morphogenetic approach and discusses its capacity to interpret macrosocial transitions The second part then draws a prospective outline of the social formation known as the morphogenic society showing how unbound morphogenesis in a globalized world shapes such crucial phenomena as social norms war and violence openness and closure as adaptive responses from social organizations Lastly the third part examines the anthropological consequences of these societal trends focusing on self and character as well as on human fulfillment and the good life **Cognitive Justice in a Global World** Boaventura de Sousa Santos, 2007-01-01 The book s main argument is that global social injustice is by and large epistemological injustice It maintains that there can be no global social justice without global cognitive justice **The Social Science of the Citizen Society** Michael Kuhn, 2021-09-21 The social sciences and humanities worldwide are discovering the necessity to self critically reshape their theorizing The first critique of social science theorizing calls for globalizing the second parallel critique for de colonizing social thought In his highly topical book Michael Kuhn discusses why and how the globalization of social science theorizing introduces thinking through nation state perspectives as an up to date methodological must how the de colonialization of social science theorizing with the critique of Eurocentrism and its thinking through space paves the way for the worldwide implementation of thinking through nation state views transforming the social science world into a multiplicity of provincialized theories with which odd argumentations the indigenization of thought produces contributions to the ideological armament of the new states in the so called 3rd world after their transformation into the very society system of the former colonizers how these indigenized theories make discourses among de colonized theories a matter of which provincialized theory manages to rule the worldwide creation of theories how the masterminds of globally de colonized thinking present imperial thought as guiding theories for mankind s thinking what templates for the turn from anti capitalist towards nationalistic thinking Historical Materialism has provided and what consequences all this has for the social sciences as a voice in political debates about the world *The Public Value of the Social Sciences* John D. Brewer, 2013-05-23 John Brewer explores the essential nature of the social sciences and the ways in which notions of impact and value could be reframed to generate a more productive debate around their contribution to the

**Research in Education** ,1974 **Teaching in a Globally-Connected World** Ervin F. Sparapani,Pamela L. Ross McClain,2016-07-29 This book examines the current social political economic and religious climate

of the world makes projections for the future and then makes suggestions for what the contributors believe educators need to think about in order to adequately prepare young people to successfully navigate that future We live in a globally connected world and young people as they move into the future need to be prepared to live in that future Schools and teachers tend to focus on the present which is okay however schools and teachers must decide what is important to know in the present in order for young people to be successful in the future The responsibility of education today must be to prepare learners to live in an unknown future that is global and not be so focused on an uncertain present
