recommended as a general professional skill and is a core component of the practice capabilities in social work in countries across the Western world. However, despite unequivocal support for it in social work education, sustaining critical reflection within organisations as both an individual and collective practice supported by organisational cultures is problematic. With contributions from social work practitioners and educators who have sought to embed critical reflection into broader activities and cultures within their organizations, the book addresses common features of critical reflection and challenges and benefits in specific case studies. This book will inspire and develop new thinking and vision about being critically reflective in organisations and facilitate efforts to improve the learning and working experience in addition to that of service quality and delivery.
