Pushing Boundaries in Southwestern Archaeology Stephen E. Nash, Erin L. Baxter, 2023-04-07 Pushing Boundaries in Southwestern Archaeology draws together the proceedings from the sixteenth biennial Southwest Symposium In exploring the conference theme contributors consider topics ranging from the resuscitation of archaeomagnetic dating to the issue of Athapaskan origins from collections based studies of social identity foodways and obsidian trade to the origins of a rock art tradition and the challenges of a deeply buried archaeological record The first of the volume s four sections examines the status history and prospects of Bears Ears National Monument the broader regulatory and political boundaries that complicate the nature and integrity of the archaeological record and the cultural contexts and legal stakes of archaeological inquiry The second section focuses on chronological big data in the context of pre Columbian history and the potential and limits of what can be empirically derived from chronometric analysis of the past The chapters in the third section advocate for advancing collections based research focusing on the vast and often

untapped research potential of archives previously excavated museum collections and legacy data The final section examines the permeable boundaries involved in Plains Pueblo interactions obvious in the archaeological record but long in need of analysis interpretation and explanation Contributors James R Allison Erin Baxter Benjamin A Bellorado Katelyn J Bishop Eric Blinman J Royce Cox J Andrew Darling Kaitlyn E Davis William H Doelle B Sunday Eiselt Leigh Anne Ellison Josh Ewing Samantha G Fladd Gary M Feinman Jeffrey R Ferguson Severin Fowles Willie Grayeyes Matthew Guebard Saul L Hedquist Greg Hodgins Lucas Hoedl John W Ives Nicholas Kessler Terry Knight Michael W Lindeman Hannah V Mattson Myles R Miller Lindsay Montgomery Stephen E Nash Sarah Oas Jill Onken Scott G Ortman Danielle J Riebe John Ruple Will G Russell Octavius Seowtewa Deni J Seymour James M Vint Adam S Watson **Handbook of Rock Art Research** David S.

The Archaeology of Tribal Societies William A. Parkinson,2002-03-01 Anthropological archaeologists have long attempted to develop models that will let them better understand the evolution of human social organization In our search to understand how chiefdoms and states evolve and how those societies differ from egalitarian bands we have neglected to develop models that will aid the understanding of the wide range of variability that exists between them This volume attempts to fill this gap by exploring social organization in tribal or autonomous village societies from several different ethnographic ethnohistoric and archaeological contexts from the Pre Pottery Neolithic Period in the Near East to the contemporary Jivaro of Amazonia **Mimbres During the Twelfth Century** Margaret Cecile Nelson,1999 During the mid twelfth century villages that had been occupied by the Mimbres people in what is now southwestern New Mexico were depopulated and new settlements were formed While most scholars view abandonment in terms of failed settlements Margaret Nelson shows that for the Mimbres abandonment of individual communities did not necessarily imply abandonment

of regions By examining the economic and social reasons for change among the Mimbres Nelson reconstructs a process of shifting residence as people spent more time in field camps and gradually transformed them into small hamlets while continuing to farm their old fields Challenging current interpretations of abandonment of the Mimbres area through archaeological excavation and survey she suggests that agricultural practices evolved toward the farming of multiple fields among which families moved with small social groups traveling frequently between small pueblos rather than being aggregated in large villages Mimbres during the Twelfth Century is the first book length contribution on this topic for the Classic Mimbres period and also addresses current debates on the role of Casas Grandes in these changes By rethinking abandonment Nelson shows how movement by prehistoric cultivators maintained continuity of occupation within a region and invites us to reconsider the dynamic relationship between people and their land **Debating Lapita** Stuart

Bedford,Matthew Spriggs,2019-12-12 This volume is the most comprehensive review of Lapita research to date tackling many of the lingering questions regarding origin and dispersal Multidisciplinary in nature with a focus on summarising new findings but also identifying important gaps that can help direct future research Professor Scott Fitzpatrick Department of Anthropology University of Oregon This substantial volume offers a welcome update on the definition of the Lapita culture It significantly refreshes the knowledge on this foundational archaeological culture of the Pacific Islands in providing new data on sites and assemblages and new discussions of hypotheses previously proposed Dr Fr d rique Valentin Centre national de la recherche scientifique CNRS Paris This volume comprises 23 chapters that focus on the archaeology of Lapita a cultural horizon associated with the founding populations who first colonised much of the south west Pacific some 3000 years ago The Lapita culture has been most clearly defined by its distinctive dentate stamped decorated pottery and the design system represented on it and on further incised pots Modern research now encompasses a whole range of aspects associated with Lapita and this is reflected in this volume The broad overlapping themes of the volume Lapita distribution and chronology society and subsistence relate to research questions that have long been debated in relation to Lapita *Mimbres Society*

Valli S. Powell-Marti,Patricia A. Gilman,2019-11-01 The enchanting pottery created by the Mimbres people of southwestern New Mexico is considered by many scholars to be unique among all the ancient art traditions of North America Distinguished by their elaborate hand painted black on white designs Mimbres vessels have inspired artists and collectors and many insist that they are unrivaled in several millennia of pottery making While the attention to the extraordinary Mimbres painted pottery is well merited the focus on its artistry alone has obscured other equally remarkable achievements and compelling questions about this unique and sophisticated society Was the society as truly egalitarian as it has often been suggested Was the pottery produced by specialists How did Mimbres architecture among the first to break living spaces into apartment style room blocks reflect the relationships among individuals families and communities Did aggregate housing units translate into social equality or did subtle hierarchies exist Tracing the way technology evolved in ceramic decoration architecture and

mortuary practices this collection of eight original contributions brings new insights into previously unexplored dimensions of Mimbres society The contributors also provide vivid examples of how today s archaeologists are linking field data to social theory **Becoming Hopi** Wesley Bernardini, Stewart B. Kuwanwisiwma, 2021-07-06 **Becoming Hopi** is a comprehensive look at the history of the people of the Hopi Mesas as it has never been told before The product of more than fifteen years of collaboration between tribal and academic scholars this volume presents groundbreaking research demonstrating that the Hopi Mesas are among the great centers of the Pueblo world **Early State Formation in Central Madagascar** Henry T. Archaeological Society Quarterly ,1997 Connected Communities Matthew A. Peeples, 2018-02-20 The Cibola region on the Arizona New Mexico border has fascinated archaeologists for more than a century The region s core is recognized as the ancestral homeland of the contemporary Zuni people and the area also spans boundaries between the Ancestral Puebloan and Mogollon culture areas The complexity of cross cutting regional and cultural designations makes this an ideal context within which to explore the relationship between identity and social change at broad regional scales In Connected Communities Matthew A Peeples examines a period of dramatic social and political transformation in the ancient Cibola region ca A D 1150 1325 He analyzes archaeological data generated during a century of research through the lens of new and original social theories and methods focused on exploring identity social networks and social transformation In so doing he demonstrates the value of comparative synthetic analysis The book addresses some of the oldest enduring questions in archaeology How do large scale social identities form How do they change How can we study such processes using material remains Peeples approaches these questions using a new set of methods and models from the broader comparative social sciences relational sociology and social networks to track the trajectories of social groups in terms of both networks of interactions relations and expressions of similarity or difference categories He argues that archaeological research has too often conflated these different kinds of social identity and that this has hindered efforts to understand the drivers of social change In his strikingly original approach Peeples combines massive amounts of new data and comparative explorations of contemporary social movements to provide new insights into how social identities formed and changed during this key period
