Social Exclusion in European Cities Judith Allen, Goran Cars, Ali Madanipour, 2012-08-21 Across Europe concern is rising over the disintegration of social relations and the growing number of people who are being socially excluded social Exclusion in European Cities the first major study of this topic provides a definition of social exclusion and looks at both the processes which cause it and the dimensions of the problem throughout Europe The experiences of people living in areas or neighbourhoods with low rates of social integration are considered illuminating the human impact of exclusion where it is most visible Finally the contributors evaluate the various policy and community initiatives which are currently confronting the problem in a wide sample of European Cities on a variety of levels from inform individual actions to supra national European Union policy and suggest new ways in which social exclusion could be tackled With most large cities experiencing some degree of social exclusion this is an important volume for all those working in the areas of regional policy town planning housing management social work community development sociology political science and urban studies **Social Exclusion in European Cities** , **The Globalized City** Frank Moulaert, Arantxa Rodriguez, Erik Swyngedouw, 2003-03-27 This book explores the dynamics that have accompanied the implementation of large scale Urban Development Projects UDPs in nine European cities within the European Union EU It contributes to the analysis of the relationship between urban restructuring and social exclusion integration in the context of the emergence of the European wide new regimes of urban governance These regimes reflect the reawakening of neo liberal policy and the rise of a New Urban Policy favouring private investments and deregulation of property and labour markets The selected UDPs further reflect global pressures and changing systems of local regional and or national regulation and governance These projects while being decidedly local capture global trends and new national and local policies as they are expressed in particular institutional forms and strategic practices The large scale urban interventions were deliberately chosen as reflections of a particular hegemonic and dominant expression of urban policy as pursued during the 1990s The book provides a panoramic view of urban change in some of Europe s greatest cities The nine case studies include The Europeanization of Brussels The Guggenheim museum in Bilbao the new financial district in Dublin the science university technology complex Adlershof in Berlin the 1998 World Expo in Lisbon Athens s bid to stage the Olympic Games Vienna s Donau City Copenhagen s Oresund project and Naples new business district These case studies testify to the unshakable belief the city elites hold in the healing effects that the production of new urban mega projects and events has on their city s vitality and development potential The book also analyses the down side of this development in terms of social exclusion the formation of new urban elites and the consolidation of less democratic forms of urban governance The principal aim is to show how the production of these new urban spaces is actually also part of the production of a new polity a new economy and new forms of living urban life that are not very promising for a socially harmonious and just future for metropolitan urban Europe *Cities of Europe* Yuri
