Kenneth C. Land, Alex C. Michalos, M. Joseph Sirgy, 2011-11-25 The aim of the Handbook of Social Indicators and Quality of Life Research is to create an overview of the field of Quality of Life QOL studies in the early years of the 21st century that can be updated and improved upon as the field evolves and the century unfolds Social indicators are statistical time series used to monitor the social system helping to identify changes and to guide intervention to alter the course of social change Examples include unemployment rates crime rates estimates of life expectancy health status indices school enrollment rates average achievement scores election voting rates and measures of subjective well being such as satisfaction with life as a whole and with specific domains or aspects of life This book provides a review of the historical development of the field including the history of QOL in medicine and mental health as well as the research related to quality of work life QWL programs It discusses several of QOL main concepts happiness positive psychology and subjective wellbeing Relations between spirituality and religiousness and QOL are examined as are the effects of educational attainment on QOL and marketing and the associations with economic growth The book goes on to investigate methodological approaches and issues that should be considered in measuring and analysing quality of life from a quantitative perspective The final chapters are dedicated to research on elements of QOL in a broad range of countries and populations Social Change in Contemporary China Wenfang Tang, Burkart Holzner, 2010-11-23 Social Change in Contemporary China offers a wide ranging examination of Chinese institutional change in areas of education religion health care economics labor family and local communities in the post Mao era Based on the pioneering work of sociologist C K Yang 1911 1999 and his institutional diffusion theory the essays analyze and develop the theory as it applies to both public and private institutions The interrelationship of these institutions composes what Yang termed the Chinese system and affects nearly every aspect of life Yang examined the influence of external factors on each institution such as the influence of Westernization and Communism on family and the impact of industrialization on rural markets He also analyzed the impact of public opinion and past culture on institutions therein revealing the circular nature of diffusion Perhaps most significant are Yang's insights on the role of religion in Chinese society Despite the common perception that China had no religion he uncovers the influence of classical Confucianism as the basis for many ethical value systems and follows its diffusion into state and kinship systems as well as Taoism and Buddhism Writing in the early years of Communism Yang had little hard data with which to test his theories The contributors to this volume expand upon Yang's groundbreaking approach and apply the model of diffusion to a rapidly evolving contemporary China providing a window into an increasingly modern Chinese society and its institutions **The East Asian Welfare Model** Roger Goodman, Huck-Ju Kwon, Gordon White, 2006-12-05 For many politicians and observers in the West East Asia has provided a broad range of positive images of the state's intervention in society Neoliberals grew

excited by popular welfare systems that cost little in expenditure and bureaucracy Social democrats thought they had found a model for social cohesion and equality In fact the reality in East Asia is rather different from these stereotypes In this book six specialists of six different societies in East Asia Japan South Korea Taiwan China Singapore and Hong Kong examine the role of the state in their welfare systems There are detailed case studies on pensions health insurance housing and personal social services They provide an up to date detailed account of how these systems have developed as well as an examination of the question of whether these welfare regimes are the natural outgrowth of cultural traditions or the result of economic and political conditions This broad ranging and detailed study will be welcomed by both students and policy makers as the first proper academic study in English to have such a wide coverage of this topic Its clarity and authority should come as a welcome alternative to the more common misconceptions about Asian society **Hong Kong's History** Tak-Wing

Ngo,2002-09-11 Rewriting Hong Kong s history from the bottom up the chapters investigate vital but hitherto obscured aspects of the colony s rise They cover the Chinese collaboration with the colonial regime legal discrimination and intimidation rural politics social movements government business relations industrial policy flexible manufacturing and colonial historiography Drawing together contributions from historians sociologists and political scientists the book highlights the role played by a variety of social actors in Hong Kong s history and differs both from recent celebrations of British colonialism and anti colonial Chinese nationalism Transforming Gender and Development in East Asia Esther Ngan-ling Chow,2013-12-02 Transforming Gender and Development in East Asia brings together a collection of original essays from top scholars in the United States and Asia to explore the centrality of gender in the process of economic development in East Asia Contributors demonstrate through ethnography personal narratives field observation and in depth interviews the essential parts women have played in the national growth economic restructuring and industrialization of East Asian countries including South Korea Taiwan China Hong Kong Singapore and China The Principles and Practice of

Quality-of-Life Research in Chinese, Western and Global Contexts Daniel T.L. Shek,Ying Keung Chan,Paul S.N. Lee,2005-09-26 The majority of studies on the quality of life have been conducted in Western contexts and are based on

Western participants Comparatively speaking there are only a few studies that have been conducted in different Chinese contexts Also there are fewer QOL studies based on children and adolescents or studies that examine the relationship between QOL and economic disadvantage In addition more research is needed to address the methodological issues related to the assessment of quality of life This volume is a constructive response to the challenges described above It is the first book to cover research in Chinese Western and global contexts in a single volume It is a ground breaking volume in which Chinese studies on the quality of life are collected The book includes papers addressing family QOL quality of life in adolescents experiencing economic disadvantage and methodological issues in the assessment of QOL It is written by researchers working in a variety of disciplines      *Assessing Quality of Life and Living Conditions to Guide National Policy* Michael R. Hagerty, Joachim Vogel, Valerie Møller, 2006-04-11 This book is a useful how to book for researchers and government offices wanting to start or improve their own QOL survey and contains best practices from all over the world It is a valuable resource for researchers policy and for those wishing to effect changes in public policy      *Social Development in Asia* Kwong-leung Tang, 2012-12-06 Most Asian countries have shown a strong commitment to rapid economic development Economists have argued that the fruits from economic development will be spread equitably throughout the population In the absence of a strong tradition of social rights social development in Asia has long been taken for granted This collection documents social development in the Asian countries of China Hong Kong Taiwan South Korea Thailand and India and concludes that social development has lagged behind economic development This has given rise to distorted development in many countries Serious development problems of poverty and inequalities have lingered even in these economically advanced countries of Hong Kong Taiwan and Singapore These problems have been exacerbated in the wake of the Asian economic crisis In order to harmonize social development with economic growth Asian states ought to be more proactive in their development agendas As a text on social development in Asia this book is primarily intended for practitioners and students of social work social administration and social policy It is also relevant for students and practitioners of sociology economics and public policy      *The Family and Social Change in Chinese Societies* Dudley L. Poston, Jr., Wen Shan Yang, Demetrea Nicole Farris, 2013-11-26 This book focuses on families and their changes in Taiwan and China Traditional notions of what constitutes a family have been changing in China Taiwan and other Asian countries The chapters in this book provide interesting methodological and substantive contributions to the discourse on family and social change in Chinese societies They also underscore the implications of the various social changes in Chinese families Written by Chinese and Western scholars they provide an unprecedented overview of what is known about the effects of social change on Chinese families One might think that defining a family is an easy task because the family is so significant to society and is universal The family is the first place we learn culture norms values and gender roles Families exist in all societies throughout the world but their constitution differs In the past several decades there have been many changes in the family in Taiwan and China

For instance whereas in the West we use a bilineal system of descent in which descent is traced through both the mother's side and the father's side of the family in many parts of China descent is patrilineal although this is changing and China and Taiwan are starting to assume a family constitution similar to that in the West. This and other issues are discussed in great detail in this book. Indeed it is the very nature of the differences that motivated the writing of this book on changing families in Taiwan and China. The chapters in Part I The Family in Taiwan and China focus on the basic family issues in Taiwan and China that provide the groundwork for many of the chapters that follow. Chapter 1 is about the distribution of resources in the family in Taiwan. Chapter 2 focuses on filial piety and the autonomous development of adolescents in the Taiwanese family and Chapter 3 explores the important issue of family poverty in Taiwan. Chapter 4 moves away from Taiwan and looks at several issues of family growth and change in Hong Kong noting the interesting similarities and differences between Hong Kong and China. Part II Issues of Marriage the Family and Fertility in Taiwan and China focuses specifically on marriage family and fertility. In Chapter 5 the authors discuss the relationships between marital status socioeconomic status and the subjective well being among women in Hong Kong and Taiwan. Chapter 6 describes patterns of sexual activity in China and the United States. Chapter 7 considers gender imbalances in Taiwan and their impact on the marriage market. Chapter 8 also focuses on Taiwan and examines the effects of mothers' attitudes on daughters' interaction with their mothers in law. Chapter 9 compares female and male fertility trends and changes in Taiwan. Part III Children and the Family in East Asia and in Western Countries consists of comparative studies of the family and children. Chapter 10 examines the dynamics of grandparents caring for children in China. Chapter 11 explores family values and parent child interaction in Taiwan. Chapter 12 examines the significant amount of diversity among families in contemporary Taiwan. Chapter 13 describes adolescent development in Taiwan. Chapter 14 examines the impact of son preference on fertility in China South Korea and the United States. And Chapter 15 explores the determinants of intergenerational support in Taiwan. The final chapter in our book the only chapter in Part IV The Family and the Future in Taiwan examines the future of the family in Taiwan with respect especially to the marriage market and aged dependency.
