Productivity and Industrial Growth and Reducing Poverty Maureen Mackintosh, Joanna Chataway, Marc Wuyts, 2021-04-26 Development and the ending of mass poverty require a massive increase in productive capabilities and production in developing countries. Some countries notably in Asia are achieving this. Yet pro-poor aid policies especially for the least developed countries operate largely without reference to policy thinking on the promotion of innovation for productivity growth. Conversely, policy makers and researchers on innovation and industrial policies tend to know little about the potential for social protection to support innovation and productivity improvement. This book aims to focus attention on this gap between research on innovation and on poverty reduction and to identify some of its policy consequences to set out some ways in which this gap can be bridged analytically and empirically and to contribute to the creation of an agenda for further research and an understanding of the urgency of the implied rethinking. The first two chapters provide sustained arguments for embedding social policy thinking in much more productivist frameworks of thought that focus on raising productivity and employment and for identifying growth theories that can incorporate satisfactory understandings of innovation and employment upgrading. A set of chapters then tackle these broad themes in the context of health, addressing the interlinked issues of innovation, health, inequity and associated impoverishment. The final set of chapters examines the challenge of creating industrial policies that generate both innovation and employment using and going beyond concepts of systems of innovation.

Nordic Social Attitudes in a European Perspective H. Ervasti, Heikki Ervasti, 2008-01-01 For outsiders, the popularity and social sustainability of the extensive scope of Nordic welfare states such as the strong role of the state and high levels of taxation remains something of a mystery. Making use of recent international survey data, this important book goes some way towards solving this mystery. It underlines the remarkable success of Nordic welfare institutions which help to maintain not only low rates of poverty and inequality but high levels of well-being, trust, social capital and political participation. Jochen Clasen, University of Edinburgh, UK. Nordic welfare states have long enjoyed a leadership position in the provision of social welfare. They are now caught up in the current of thoroughgoing reform that is sweeping across Europe. This book uses data from the European Social Survey in fresh and innovative ways to demonstrate the resilience of Nordic models and to show how political discourses are changing across a whole range of policy areas. Peter Taylor-Gooby, University of Kent, UK. This book addresses the effect that institutional settings typical to the Nordic countries have upon people's attitudes and behaviour. Placed within a European comparative perspective, the analyses presented by the contributing authors centre around issues relating to the welfare state, politics, family and work as well as cultural concerns including economic morality and religiosity. Despite differences between the Nordic countries, the overall impression given is of a shared outlook and way of life. In the European context, the Nordic countries particularly stand out as a distinct group, therefore demonstrating their institutional similarities. Providing highly rigorous and up-to-date data with a wide coverage of topics, this book will be of great interest to academics and students in sociology, social policy and political science. It will also
