## **Social Policy In Hong Kong:**

**Social Policy in Hong Kong** Paul Wilding, Ahmed Shafiqul Huque, Julia Lai Po-Wah Tao, 1997 Social Policy in Hong Kong provides for the first time a comprehensive and critical analysis of social policy in Hong Kong. It shows that Hong Kong is far from being a simple free market economy. In many areas Hong Kong has highly developed social policies which make a major contribution to the quality of life of its citizens. An introductory chapter provides background information on the economic, social and political structure of the region. Subsequent chapters cover issues such as health, housing, education, poverty and social security, social care, transport and labour protection. A concluding chapter draws out the essential nature of the Hong Kong approach and constructs a balance sheet of success and failure. With Hong Kong becoming a special administrative region of the People's Republic of China on 1 July 1997, this timely book describes social policy in the territory at the end of an era.

Social Security Policy in Hong Kong Chak Kwan Chan, 2011-01-01 For more than four decades, free market economists and right wing politicians have touted Hong Kong as a model of capitalism and a market economy success story. Social Security Policy in Hong Kong: From British Colony to Special Administrative Region of China by Chak Kwan Chan argues that Hong Kong's capitalism is not the result of democratic choice but the consequence of an administrative led polity that has had suppressed democracy, limited trade unions activities and manipulated traditional Chinese welfare ideologies to maintain a small government. Social Security Policy in Hong Kong is the first book that systematically analyzes the dynamic relationships between Hong Kong's polity, Chinese welfare ideologies and social security provisions from British colonial rule to China's special administrative region.

Social Policy Reform in Hong Kong and Shanghai: A Tale of Two Cities Linda Wong, Lynn T. White, III, Gui Shixun, 2016-07-22 As the richest cities in the world's most populous nation, Hong Kong and Shanghai have recently experienced dynamic growth spurred by more and better managed capital. These cities also have social problems whose solutions will cost money. Their urban populations are aging. Health finance at the level these First World cities demand threatens to consume a large portion of the municipal budgets. Eldercare and social security are now less well covered by traditional Chinese families. Education has become more complex and public tuition where it occurs brings with it official plans for schools. Immigrants have flocked to Shanghai from inland China and Hong Kong's border has become a protector of the former colony's high productivity jobs. Housing problems also have deeply affected both cities albeit in somewhat different ways. This book provides a comprehensive overview of the similarities and differences between social policies in the two cities. Each chapter covers a different issue: health, finance, housing, education, labor, poverty and social security, eldercare and migration and competitiveness. The contributors explore pertinent developments in each city and analyze the similarities and differences between the two cities' approaches to social policies. They focus on policy reform and the interface between social policy and its environment. One main theme throughout the book is the extent to which spending for capital accumulation is in conflict with spending for social policies.

**Managing Social Change and Social**

**Policy in Greater China** Ka-Ho Mok, Maggie K. W. Lau, 2013-11-07 East Asia is at the heart of the global economic transformation and the countries of the region are witnessing rapidly changing labour markets alongside the pressure to cut production costs and lower taxes in order to become successful competition states. These changes have resulted in increased welfare demands which governments, organizations and agencies across the region have had to address. This book examines welfare regimes in the Greater China region encompassing mainland China, Hong Kong, Macao and Taiwan. In so doing it explores the ways in which the rapid growth and internationalisation of the economy across Greater China is presenting new social policy challenges that governments, social welfare organizations and agencies in the region are having to respond to. Rather than simply describing and categorising welfare systems, the contributors to this volume add to our understanding of how one of the major economic transformations of the contemporary era in East Asia is shaping welfare provision in the region. In turn, in this context of economic change, they examine the new strategies and measures that have been adopted in order to reduce the heavy burden on the state in terms of welfare provision whilst also attempting to diversify funding and provision sources to meet the pressing welfare needs. Based upon extensive fieldwork by leading scholars of social policy, this book will appeal to students and scholars of Asian social policy, comparative development and social policy, social welfare and Chinese studies.

*Social Policy in East and Southeast Asia* M. Ramesh, 2004-08-02 Social Policy in East and South East Asia provides the first systematic comparison of the policy sectors of income maintenance, health, housing and education in Hong Kong, South Korea, Singapore and Taiwan. It focuses particularly on the provision and financing arrangements of these four Asian newly industrialized economies and their outcomes in terms of adequacy, efficiency and equity, drawing on extensive primary research carried out by the author. Locating the importance of Asian social policies in the wake of the recent financial crisis in the region, this work provides a comprehensive analysis of the different types of welfare state in contemporary Asia.

*Colonial State and Social Policy* Kwong-leung Tang, 1998-10-29 Colonial State and Social Policy looks at the determinants of social policy in developing countries in general and Hong Kong in particular, in an attempt to remedy inconsistent results, artificial dichotomies of quantitative and qualitative methodologies and an obvious neglect of developing countries in the field of social policy research. Using an integrated approach of quantitative and historical analysis, the study tests out the variables as predicted by the dominant theories in the case of Hong Kong. Of the three major theoretical approaches that dominate research, the industrial society approach, the social democratic model and the state-centered theory, the state-centered theory offers the best explanation of policy development. Meanwhile, historical analysis delineates four phases of social development which are marked by different approaches: residualism, big bang expansion, incrementalism and privatization. The results of the study cast many doubts on the applicability of the concept of the welfare state regime as the developmentalist state of Hong Kong has turned to social welfare to create a peaceful environment for its economic development and to enhance the legitimacy of the colonial system.

Social Policy and Poverty in East Asia James Midgley, Kwong Leung Tang, 2009-09-11 This book looks at the role of social policy and particularly social security in addressing the ongoing challenge of poverty in East Asia despite the region's spectacular experience of economic growth in recent decades The East Asian miracle resulted over the last four decades in a transformation of the region's traditional agrarian economies and significant increases in standards of living for many ordinary people Even though it was given little attention poverty has remained an ongoing problem The problem became particularly evident however with the Asian financial crisis of 1997 when many low income and middle class workers became unemployed As a result of this crisis the need for effective social policies and social security programs were recognized The idea that economic growth would solve the problem of poverty was increasingly challenged Even in China today where rapid growth has created new employment opportunities and the promise of prosperity for many the government has recognized that the problem of poverty cannot be addressed only through economic growth but that comprehensive social policies must be formulated and this includes the development of an effective security system
