Matrix Germán Solinís,Nicolas Baya-Laffite,2011-01-01 Social science research provides not only abstract conceptual knowledge about society but also concrete instrumental knowledge It enables us to take action to recompose the world we live in However this book rejects narrow and simplistic conceptions of research use and its impact on policy making to embrace a more complex approach to seeing and dealing with social science In the paradigm of evidence based policy evidence is understood in its broad sense as information that helps form policies Nonetheless within current practices and discourse it is not clear what information is what is really meant by evidence and how it can be obtained objectively The book draws on papers presented at the International Forum on the Social Science Policy Nexus where experts examined current practices and problems in areas such as social policy migration urban policies and globalisation The Forum set a precedent in terms of dialogue between researchers and policy makers The authors contribute to enriching and elucidating the most common conceptualisations of the research policy nexus They represent a rich diversity of views although most agree that an effective strategy to enhance social science policy linkages should be underpinned by a theoretical and methodological framework that takes into account the interplay of different social actors **World Social Science Report 2013**
