networking and cultural competence Analyzing the impact of capital types throughout the text helps map out the prospects for individuals families and also classes to maintain or alter their position in social stratification systems Learning Goals Upon completing this book readers will be able to Analyze the four major American classes as well as how race and gender are linked to inequalities in the United States Understand attempts to reduce social inequality Identify major historical events that have influenced current trends Understand how qualitative sources help reveal the inner workings that accompany people s struggles with the socioeconomic order Recognize the impact of social stratification systems on individuals and families

Social Stratification in the United States The Open The Open Courses Library,2019-10-23 Social Stratification in the United States Sociology Stratification systems are either closed meaning they allow little change in social position or open meaning they allow movement and interaction between the layers A caste system is one in which social standing is based on ascribed status or birth Class systems are open with achievement playing a role in social position People fall into classes based on factors like wealth income education and occupation A meritocracy is a system of social stratification that confers standing based on personal worth rewarding effort Chapter Outline Introduction What Is Social Stratification Social Stratification and Mobility in the United States Global Stratification and Inequality Theoretical Perspectives on Social Stratification The Open Courses Library introduces you to the best Open Source Courses [Social Stratification in the United States](#) Jack et al Roach, *Social stratification in Japan and the United States* Christoph Kilian,2007-03-20 Seminar paper from the year 2004 in the subject Business economics Business Management Corporate Governance grade 2 3 Hamburg University of Applied Sciences course Kultur und Sozialwissenschaften language English abstract Social stratification implies that in every society goods and services are not equally distributed Some people are wealthy enough to buy a house others have to pay rent to live in a small apartment More generally spoken why are some people rich and others poor A society without social stratification implies that there are no inferior or superior positions and all human beings are equal and have the same prerequisites when they are born The opposite is the case People are born into families of unequal positions some are born into rich influential families others have to live under the poverty level Wouldn t it be fair for all human beings to have the same starting position when they are born In every country the reality looks different and that is a reason why social stratification is such an interesting topic To what extent have inequality and difference an impact on people s life Japan and the USA are both highly modernized and industrialized countries According to World Bank the USA has the biggest Gross National Product GNP in the world followed by Japan This fact underlines the importance of both nations for the world economy These figures get more interesting when they are put into relation with the population of each country The figure GNP per person is a measurement for the wealth of a country In this ranking the USA is in fourth place followed by Japan Albrecht et al 2003 These figures might give the impression that both countries are quite similar but there is one major difference Japan is the only non Western country that is industrialized The cultural background

is different and that is a reason why a comparison between these countries can be interesting and might lead to surprising results In this paper I will try to find out what inequality is based on and why these differences occur of varying strength in both countries In these countries social stratification depends on cultural aspects as well as economical aspects The cultural background influences the way the society deals with economy After giving an introduction about basic definitions and concepts of social stratification I will describe and analyse differences in income and education in both societies To make a comparison useful and clear I will include data from the Fischer Weltalmanach and the Human Development Report 2002 to this term paper
