Society Self:

Society in the Self Hubert J. M. Hermans, 2018-03-09 Instead of considering society as a social environment *Society in the Self* begins from the assumption that society works in the deepest regions of self and identity as expressed in phenomena like self sabotage self radicalization self cure self government self nationalization and self internationalization This leads to the central thesis that a democratic society can only function properly if it is populated by participants with a democratically organized self In this book an integrative model is presented that is inspired by three versions of democracy cosmopolitan deliberative and agonistic democracy with the latter focusing on the role of social power and emotions Drawing on these democratic views three levels of inclusiveness are distinguished in the self personal I as an individual social I as a member of a group and global I as a human being A democratic self requires the flexibility of moving up and down across these levels of inclusiveness and has to find its way in fields of tension between the self and the other and between dialogue and social power As author Hubert Hermans explains this theory has far reaching consequences for such divergent topics as leadership in the self cultural diversity in the self the relationship between reason and emotion self empathy cooperation and competition between self parts and the role of social power in prejudice enemy image construction and scapegoating The central message of this book is reflected in Mahatma Gandhi's dictum Be the change you want to see in the world

Self and Society Drew Westen, 1985-10-31 This 1985 book studies the relation between the individual and collective processes which is central to the social sciences *Self and Society* Saad Siddiqui, 2010-12-30 Self improvement is dependent on Dos and Don'ts you follow and norms you adopt Self is a conductor of society and society is the derivative of self Be your own inspiration Self, War, and Society Mary Jo Deegan, 2017-09-08 George Herbert Mead 1863 1931 is a founding figure in the field of sociology His stature is comparable to that of his contemporaries Emile Durkheim and Max Weber Mead's contribution was a profound and unique American theory that analyzed society and the individual as social objects As Mead saw it both society and the individual emerged from cooperative democratic processes linking the self the other and the community Mary Jo Deegan a leading scholar of Mead's work traces the evolution of his thought its continuity and change She is particularly interested in the most controversial period of Mead's work in which he addressed topics of

violence and the nation state Mead's theory of war peace and society emerged out of the historical events of his time particularly World War I During this period he went from being a pacifist along with his contemporaries John Dewey and Jane Addams to being a strong advocate for war From 1917-1918 Mead became a leader in voicing the need for war based on his theory of self and society After the war he became disillusioned with President Woodrow Wilson with Americans failure to support mechanisms for international arbitration and with the political reasons for American participation in World War I He returned to a more pacifist and co-operative model of behavior during the 1920s when he became less political more abstract and more withdrawn from public debate The book includes Deegan's interpretation of Mead's early social thought his friendship and family networks the historical context of America at war and the importance of analysis of violence and the state from Mead's perspective She also provides illustrative selections from Mead's work much of which was previously unpublished

Rubin, 2015-02-17 Morality is not declining in the modern world Instead a new morality is replacing the previous one Centered on individual self fulfillment and linked to administrative government it permits things the old morality forbid like sex for pleasure but forbids things the old morality allowed like intolerance and equality of opportunity

Self-Organization and Society Takatoshi Imada, 2008-04-15 Self organization is a generic term describing the capacity of a system to change its own structure by itself while interacting with the environment In this sense self organization is not environment determined or environment adaptive but is self determined and self adaptive The concept of self organization was born in the 1960s and attempts were made to establish a theory based on the logic of a system and its control In contrast the 1980s introduced a view based on the logic of creative individuals and on fluctuations Antithetical differences exist between the two The former regards the system of aggregated individuals as the object of consideration where self organization is the sum of the practices of a system led by control or self control in particular The latter focuses on the practices of individuals deviating from the logic of a system making the existing system fluctuate and transforming its structure This volume attempts to integrate these viewpoints through inquiry into the structure of the self and through self reflexion A new horizon thus opens for the synthesis of planning control action theory and spontaneous performative action theory
