The Economics of Population Growth Julian Lincoln Simon,2019-04-23 Comparison with stationary and very fast rates of population growth shows modern population growth to have long run positive effects on the standards of living This is Julian Simon s contention and he provides support for its validity in both more and less developed countries He notes that since each person constitutes a burden in the short run whether population growth is judged good or bad depends on the importance the short run is accorded relative to the long run The author first analyzes empirical data formulating his conclusions using simulation models He then reviews our knowledge of the effect of economic level upon population growth A final section of his book

considers the framework of welfare economics and values within which population policy decisions are now made He finds that the implications of policy decisions can prove inconsistent with the values that prompt their recommendation Originally published in 1977 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 World Population Trends United States. Committee on Foreign Relations,1980 **Demography Representation Delimitation: The North - South Divide in India** Ravi K. Mishra,2025 AN EXTREMELY TOPICAL BOOK AND THE FIRST OF ITS KIND ON DELIMITATION WHICH IS TO BE CARRIED OUT AFTER THE 2026 CENSUS The popular narrative around delimitation is that south India controlled its population growth through effective family planning while the north did not Therefore the argument goes delimitation expected to take place after the Census is conducted in 2026 would penalise the south for performing well In this compelling and data driven analysis Ravi K Mishra a scholar of modern Indian history and Joint Director of the Prime Ministers Museum and Library questions this belief Drawing on 150 years of comprehensive data from decennial censuses district gazetteers boundary commission reports and state reorganisation legislations Mishra reveals that all regions of India have experienced phases of peak population growth though at different times He argues that there is little causal connection between family planning and population control in India when family planning assumed importance in the 1960s under the flawed Western notion of population explosion most southern states had already grown rapidly for ninety years and almost completed their demographic transition leading to a gradual decline in growth thereafter Meanwhile trailing the south by decades the north had only then entered the peak growth phase and the north and west are currently underrepresented disrupting the one person one vote one value principle Tackling myths about demography and delimitation head on Demography Representation Delimitation is an essential read on a complex and widely misunderstood subject

Reducing Population Growth Through Social and Economic Change in Developing Countries United States. General Accounting Office,1978 Population Growth, Income Distribution, and Economic Development Nico Heerink,2012-12-06 In this book a model of long term interrelationships between income distribution population growth and economic development is developed and estimated from data for 54 countries The results indicate that a reduction of income inequality leads to lower fertility and mortality to improvedbasic needs satisfaction and to lower labour force participation of young and old males and of females in Asia and Africa The effect of income distribution on saving and consumption is found to be negligible These outcomes suggest that family planning and health policies in LDCs will show better results when they are supplemented with policies aimed at makingthe poor benefit from economic growth As regards development policy the results indicate that a reduction of income inequality does not impair the formation of physical capital but enhances the formation of human capital and lowers the growth rate of the labour force
