*Speech, Print and Decorum in Britain, 1600--1750* Elspeth Jajdelska, 2016-03-10 Filling an important gap in the history of print and reading Elspeth Jajdelska offers a new account of the changing relationship between speech rank and writing from 1600 to 1750 Jajdelska draws on anthropological findings to shed light on the different ways that speech was understood to relate to writing across the period bringing together status and speech literary and verbal decorum readership the material text and performance Jajdelska s ambitious array of sources includes letters diaries paratexts and genres from cookery books to philosophical discourses She looks at authors ranging from John Donne to Jonathan Swift alongside the writings of anonymous merchants apothecaries and romance authors Jajdelska argues that Renaissance readers were likely to approach written and printed documents less as utterances in their own right and more as representations of past speech or as scripts for future speech In the latter part of the seventeenth century however some readers were treating books as proxies for the author s speech rather than as representations of it These adjustments in the way speech and print were understood had implications for changes in decorum as the inhibitions placed on lower ranking authors in the Renaissance gave way to increasingly open social networks at the start of the eighteenth century As a result authors from the lower ranks could now publish on topics formerly reserved for the more

privileged While this apparently egalitarian development did not result in imagined communities that transcended class readers of all ranks did encounter new models of reading and writing and were empowered to engage legitimately in the gentlemanly criticism that had once been the reserve of the cultural elites Shortlisted for the European Society for the Study of English ESSE book prize 2018

**Scripts and Social Cognition** Gen Eickers, 2024-12-09 This book argues that our success in navigating the social world depends heavily on scripts Scripts play a central role in our ability to understand social interactions shaped by different contextual factors In philosophy of social cognition scholars have asked what mechanisms we employ when interacting with other people or when cognizing about other people Recent approaches acknowledge that social cognition and interaction depend heavily on contextual cultural and social factors that contribute to the way individuals make sense of the social interactions they take part in This book offers the first integrative account of scripts in social cognition and interaction It argues that we need to make contextual factors and social identity central when trying to explain how social interaction works and that this is possible via scripts Additionally scripts can help us understand bias and injustice in social interaction The author's approach combines several different areas of philosophy philosophy of mind social epistemology feminist philosophy as well as sociology and psychology to show why paying attention to injustice in interaction is much needed in social cognition research and in philosophy of mind more generally Scripts and Social Cognition How We Interact with Others will appeal to scholars and graduate students working in philosophy of mind philosophy of psychology social epistemology social ontology sociology and social psychology

*Time Perspective Theory; Review, Research and Application* Maciej Stolarski, Nicolas Fieulaine, Wessel van Beek, 2014-11-05 This book is about time and its powerful influence on our personal and collective daily life It presents the most comprehensive and up to date overview of contemporary knowledge on temporal psychology inspired by Zimbardo's work on Time Perspective TP With contributions from renowned and promising researchers from all over the globe and at the interface of social personality cognitive and clinical psychology the handbook captures the breadth and depth of the field of psychological time Time perspective as the way people construe the past the present and the future is conceived and presented not only as one of the most influential dimensions in our psychological life leading to self impairing behaviors but also as a facet of our person that can be de biased and supportive for well being and happiness Written in honor of Philip G Zimbardo on his 80th birthday and in acknowledgement of his leading role in the field the book contains illustrations of the countless studies and applications that his theory has stimulated and captures the theoretical methodological and practical pathways he opened by his prolific research

**International Law's Invisible Frames** Andrea Bianchi, Moshe Hirsch, 2021-09-23 What is international law and how does it work This book argues that our answers to these fundamental questions are shaped by a variety of social cognition and knowledge production processes These processes act as invisible frames through which we understand international law To better conceive the frames within which international law moves and performs we must understand how psychological and socio cultural factors affect decision making in an international legal process This includes identifying the groups of people and institutions that shape and alter the prevailing discourse in international law and unearthing the hidden meaning of the various mythologies that populate and influence our normative world With chapters from leading experts in the discipline employing insights from sociology psychology and behavioural science this book investigates the mechanisms that allow us to apprehend and intellectually represent the social practice of international law It unveils the hidden or unnoticed processes by which our understanding of international law is formed and helps readers to unlearn some of the presuppositions that inform our largely unquestioned beliefs about international law

*The Social Developmental Construction of Violence and Intergroup Conflict* Jorge Vala, Sven Waldzus, Maria Manuela Calheiros, 2016-08-18 This book describes how the violent dimension of intergroup relations can be better understood if the interplay between psychological and social developmental factors is taken into

account Ten unique innovative and original chapters by international scholars of social and developmental psychology address the way how social reality is constructed as a hierarchical order and how social norms beliefs and cognitive behavioral patterns are learned shared and repeatedly processed on how to uphold or challenge this social order The volume covers diverse issues such as the effects or lack thereof of power and violent video games on people s thinking and behavior the acquisition of social norms and attitudes during childhood minorities identity management strategies the role of mothers educational beliefs and the impact of ideologies This volume is inspired by the oeuvre of Maria Benedicta Monteiro emphasizing the psychogenetic and sociogenic diacronies that are too often neglected by the predominantly synchronic paradigm of social psychology It is therefore an indispensable reading for researchers and advanced students in social community and developmental psychology for scientifically interested practitioners working with families school contexts or intergroup conflict and for everyone interested in the expanding field of the social developmental approaches to attitudes and behaviour
