European Socio-Economic Integration Elias G. Carayannis, George M. Korres, 2012-12-06

Economic integration is one of the most noteworthy issues in international economic policy at the end of the twentieth century. The recent examples of the European Union (EU) and the North American Free Trade Association (NAFTA) have raised important questions about the economic integration process and the possible establishment of economic unions in other parts of the world. Against the backdrop of the financial crisis in Europe and prospects of increasing integration in Asia, this volume showcases research from an international array of researchers to provide a basic understanding of the current issues, problems, challenges and opportunities for achieving integration, addressing both empirical and theoretical aspects of such topics as monetary union, social policy reform and social union, public finance and technology policy. The chapters in Part 1 are focused primarily on economic issues while Part 2 covers on social policy, the welfare state and political reforms with a particular emphasis on the European Union. Among the questions addressed: What are the main determinants and

implications for socio economic integration How can economic policy influence the growth and integration process Why is innovation important for regional economic development What has been the policy response so far and what lessons have we learned from it And finally what are our action lines for the future Methodology and Scores of Socioeconomic Status

Consequently, we endeavor to curate a collection of works that not only highlight the challenges but also showcase the successes of embedding inclusivity into higher education.
