A Socio-cultural Perspective on Patient Safety Justin Waring,2017-11-01 This edited volume of original chapters brings together researchers from around the world who are exploring the facets of health care organization and delivery that are sometimes marginal to mainstream patient safety theories and methodologies but offer important insights into the socio cultural and organizational context of patient safety By examining these critical insights or perspectives and drawing upon theories and methodologies often neglected by mainstream safety researchers this collection shows we can learn more about not only the barriers and drivers to implementing patient safety programmes but also about the more fundamental issues that shape notions of safety alternate strategies for enhancing safety and the wider implications of the safety agenda on the future of health care delivery In so doing A Socio cultural Perspective on Patient Safety challenges the taken for granted assumptions around fundamental philosophical and political issues upon which mainstream orthodoxy relies The book draws upon a range of theoretical and empirical approaches from across the social sciences to investigate and question the patient safety movement Each chapter takes as its focus and question a particular aspect of the patient safety reforms from its policy context and theoretical foundations to its practical application and manifestation in clinical practice whilst also considering the wider implications for the organization and delivery of health care services Accordingly the chapters each draw upon a distinct theoretical or methodological approach to critically explore specific dimensions of the patient safety agenda Taken as a whole the collection advances a strong coherent argument that is much needed to counter some of the uncritical assumptions that need to be described and analyzed if patient safety is indeed to be achieved

Health Care Reform Around the World Andrew Twaddle, 2002-06-30 Health care reforms around the world from Europe and North America to Africa Latin America and Asia seem to all be market oriented reforms driven by international business interests and right wing political parties There seems to be a sudden and broad concern with the efficiency of medical care with the assertion that democratically or professionally run systems are inherently inefficient Far less concern is evident for the more traditional values held regarding medical care effectiveness or quality and equity The fact is that we have little good cross national research that systematically addresses the reform issue This book addresses that problem and attempts to look at health care reforms in a number of countries representing as wide a spectrum as possible and using a common conceptual framework that allows for comparable information to be gathered and presented on each despite differing levels of socio economic development The authors agreed on a set of models that were thought to provide reasonable guidance in answering the questions of the source of pressures for reform the alternative modes of organization that have been found in the world in recent years and the direction of change among those alternatives
