Mouzelis, 1998 *Applied Linguistics as Social Science* Alison Sealey, Bob Carter, 2004-01-01 Genre theory in the past few years has contributed immensely to our understanding of the way discourse is used in academic professional and institutional contexts However its development has been constrained by the nature and design of its applications which have invariably focused on language teaching and learning or communication training and consultation This has led to the use of simplified and idealised genres In contrast to this the real world of discourse is complex dynamic and unpredictable This tension between the real world of written discourse and its representation in applied genre based literature is the main theme of this book **Snowboarding Bodies in Theory and Practice** H. Uslaner,2003-12-16 This timely volume puts emphasis on the effect of social capital on everyday life how the routines of daily life lead people to get involved in their communities Focussing on its micro level causes and consequences the book s international contributors argue that social capital is fundamentally concerned with the value of social networks and about how people interact with each other The book suggests that different modes of participation have different consequences for creating or destroying a sense of community or participation The diversity of countries institutions and groups dealt with from Indian castes to Dutch churches from highly competent everyday makers in Scandinavia to politics avoiding Belgian women and Irish villagers offers fascinating case studies and theoretical reflections for the present debates about civil society and democracy *Reconstructing*

Development Theory E.A. of late and uneven development **There is No Such Thing as a Social Science** Phil Hutchinson, Rupert Read, 2016-02-17 The death of Peter Winch in 1997 sparked a revived interest in his work with this book arguing his work suffered misrepresentation in both recent literature and in contemporary critiques of his writing Debates in philosophy and sociology about foundational questions of social ontology and methodology often claim to have adequately incorporated and moved beyond Winch's concerns Re-establishing a Winchian voice the authors examine how such contentions involve a failure to understand central themes in Winch's writings and that the issues which occupied him in his *Idea of a Social Science and its Relation to Philosophy* and later papers remain central to social studies The volume offers a careful reading of the text in alliance with Wittgensteinian insights and alongside a focus on the nature and results of social thought and inquiry It draws parallels with other movements in the social studies notably ethnomethodology to demonstrate how Winch's central claim is both more significant and more difficult to transcend than sociologists and philosophers have hitherto imagined

Platform and Agency Mark

Carrigan, 2025-12-31 This book examines how digital platforms are reconfiguring the parameters of agency and reflexivity in contemporary social life Drawing on Margaret Archer's social realist framework it moves beyond treating platforms merely as tools or environments to conceptualize them as distinct sociotechnical structures with emergent properties and powers that shape human action without determining it The book develops the concept of platform and agency to explore the temporal dimensions of sociotechnical change tracing how platforms condition personal and collective reflexivity through mechanisms of distraction cultural abundance and multiplying communication channels While affirming the analytical distinction between structure culture and agency it demonstrates how platforms constitute a fourth dimension necessary for understanding contemporary social morphogenesis Through the conceptual pairing of psychobiography and personal morphogenesis the book offers a nuanced account of how individuals become who they are within platformized lifeworlds Rather than announcing an epochal break with previous social forms the analysis illuminates the accumulating consequences of platform mediation across biographical timescales This book will interest researchers and graduate students in social theory philosophy of technology digital sociology platform studies media and communication studies critical data studies internet studies surveillance studies sociology of knowledge digital anthropology and social informatics
